OF POPULATION AND HOUSING

NATIONAL CENSUS AND STATISTICS OFFICE
MANILA, PHILIPPINES

REPUBLIC OF THE PHILIPPINES
NATIONAL ECONOMIC AND DEVELOPMENT AUTHORITY

HIS EXCELLENCY
PRESIDENT FERDINAND E. MARCOS
Chairman

Honorable GERARDO P. SICAT
Secretary of Economic Planning
and
Director General of the Authority

NATIONAL CENSUS AND STATISTICS OFFICE *

Honorable TITO A. MIJARES
Executive Director and Civil Registrar-General

Honorable MARCELO M. ORENSE
Assistant Executive Director

* Presidential Decree No. 418 was issued (March 20, 1974) reconstituting the Bureau of the Census and Statistics into a new office under the administrative supervision of the National Economic and Development Authority.

PREFACE

This report is the last of a series on the results of the 1970 Census of Population and Housing and is the summary of the final reports for 67 provinces published earlier.

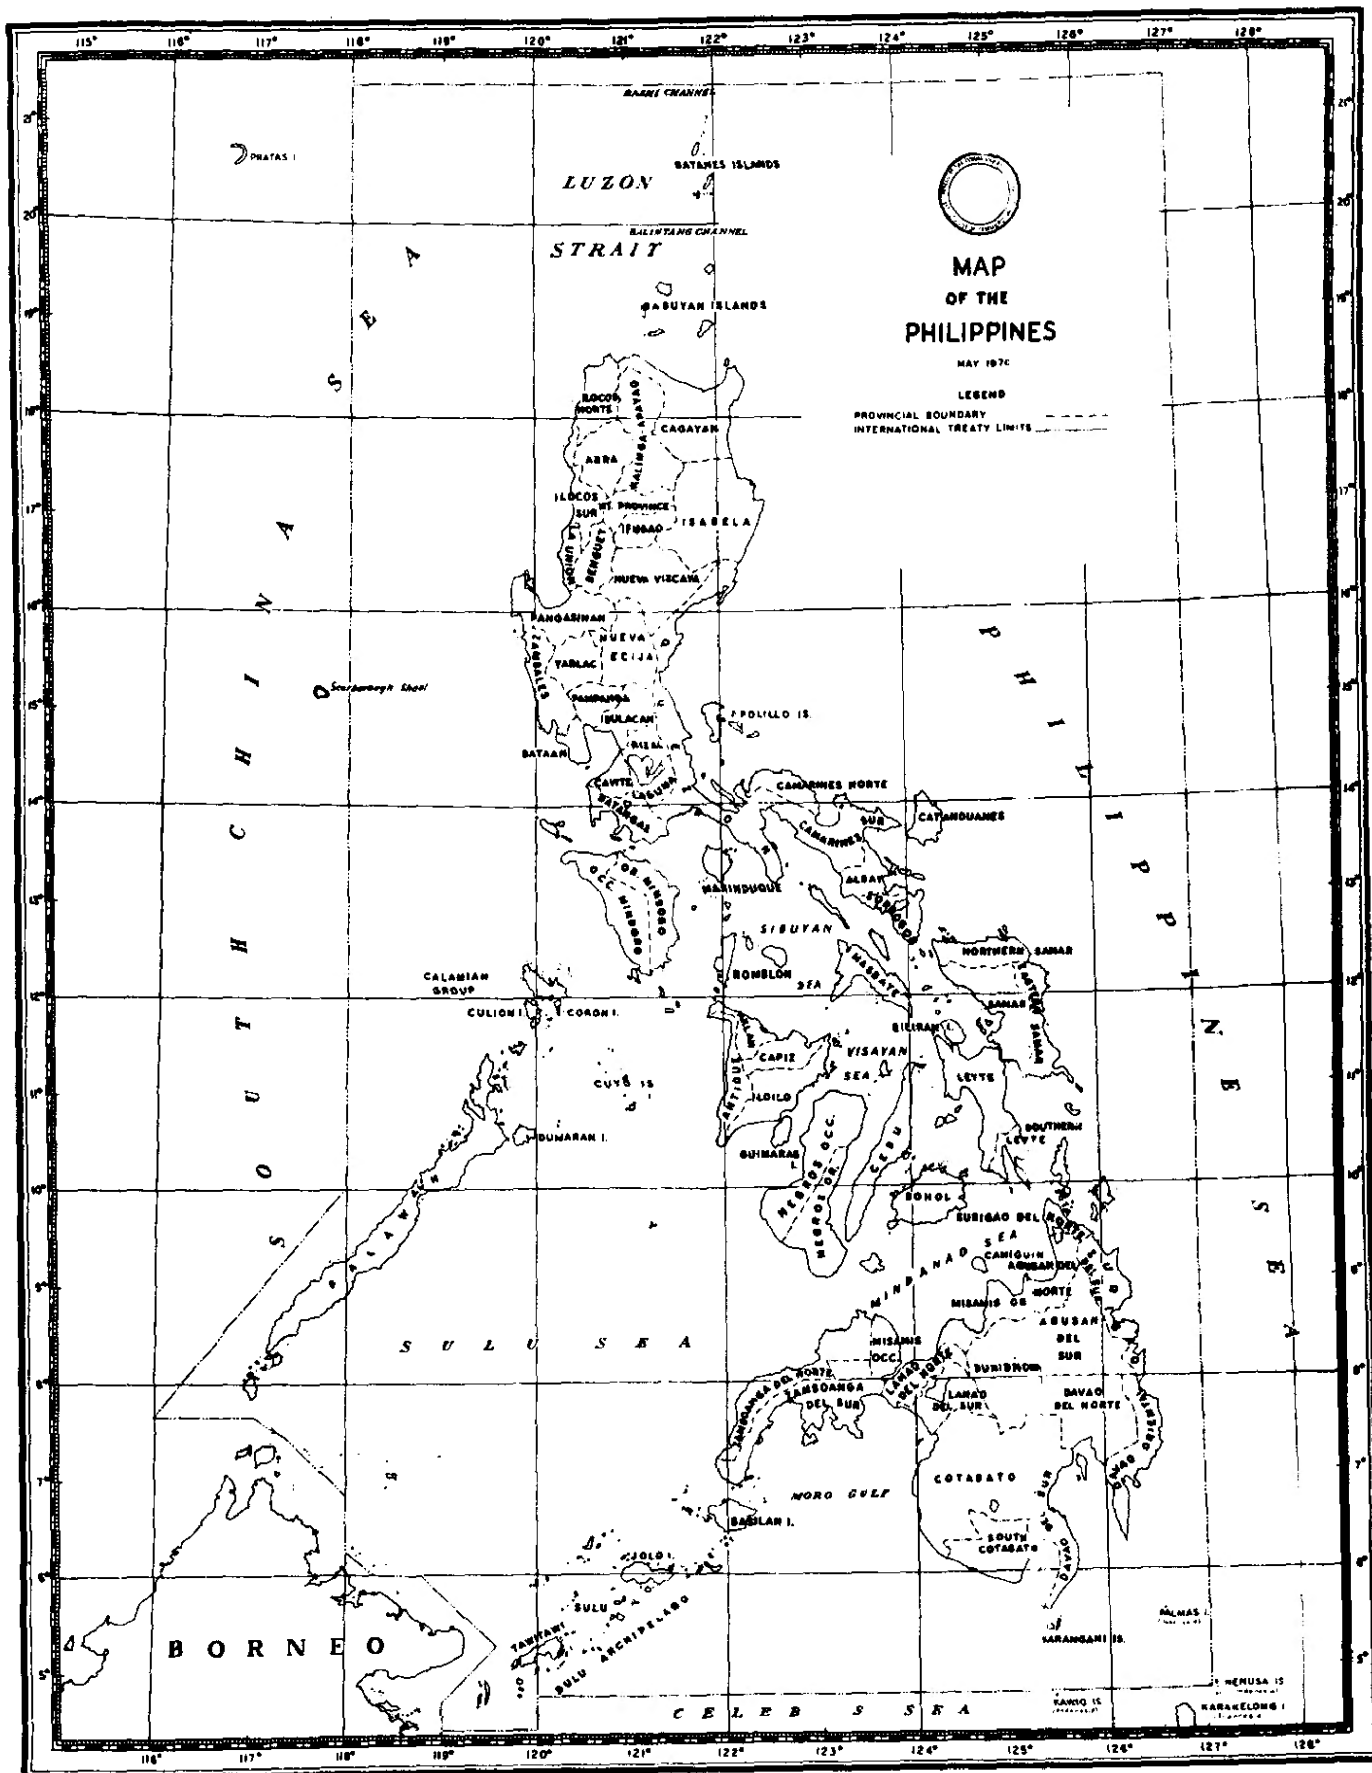

The present report dwells largely on the population of the country, by province, urban and rural, based on the data collected during the census conducted on May 6, 1970.

Other information provided are those on the number of inhabitants and their age, sex, marital status and other demographic characteristics, as well as data on literacy, school attendance, migration, fertility, labor force and other social and economic information on the population.

While basic demographic information was collected for every individual of the population, sampling was utilized in the collection of household information on literacy, migration, fertility and economic activity. The specific items covered in the sampling scheme adopted for the census are enumerated in detail in the Explanatory Text of this report.

Grateful acknowledgment is due the various government agencies, committees and coordinating boards for their invaluable assistance and cooperation in this undertaking.

1970 PH Census Form No. 2 (Ordinary Household).	959
1970 PH Census Form No. 2-A (Sample Household)	961
1970 PH Census Form No. 5-B (Institutional Census Report).	962

EXPLANATORY TEXT

Part I — POPULATION

INTRODUCTION

The 1970 Census of Population, taken on May 6, 1970, was the first to be conducted by the Bureau of the Census and Statistics after the establishment of its local offices in almost all the provinces of the country. These field offices, which are staffed by two to ten regular employees, directed, supervised and controlled the field enumeration.

The figures in this report are based on the data collected through the schedules used during the population census enumeration, namely:

- PH Census Form No. 2 (Ordinary Household) which was used in 19 out of every 20 households enumerated;
- PH Census Form No. 2-A (Sample Household) which was used in 1 out of every 20 households enumerated; and
- PH Census Form No. 5-B (Institutional Census Report) which was used for those living in an institution or collective living quarters, such as jail, training camp, convent, ship, dormitory, seminary, hospital, asylum, military camp, welfare institution, etc.

Most of the items in these schedules were pre-coded to relieve the enumerators of the tedious task of memorizing or of having to constantly refer to the Enumerator's Manual for the necessary codes, reduce processing costs and time, and make possible the use of advanced data within a relatively shorter period. The latest available electronic data processing machine was also utilized to process the census data and hasten the publication of the census reports.

The total population of the Philippines on Census Day, May 6, 1970, was 36,684,486. This figure includes the household population of 36,602,532 and the institutional population of 81,954.

AUTHORITY FOR THE 1970 CENSUS

Commonwealth Act 591 authorizes the Bureau of the Census and Statistics "to prepare for and undertake all censuses of population, agriculture, industry and commerce."

Executive Order No. 149, issued by the President on October 1, 1969, originally set Sunday, February 16, 1970, as the Census Day or the date of the start of enumeration. This was later amended by Executive Order No. 211, dated February 14, 1970, resetting the Census Day to Wednesday, May 6, 1970.

ADVISORY COMMITTEE

To avail of the expert advice of organizations and individuals with technical competence and experience in specialized fields, an Advisory Committee was formed.

Represented in the Committee were the Population Institute; National Coordinating Center for the Study and Development of

Filipino Children and Youth; University of the Philippines; Philippine Statistical Center; National Economic Council; Presidential Economic Staff; Department of Labor; Regional Urban Planning Office; People's Homesite and Housing Corporation; Department of Health; Department of National Defense; National Science Development Board; Commission on National Integration; Presidential Arm on Community Development; Bureau of Private Schools; Bureau of Public Schools; Budget Commission; Philippine Statistical Association; Institute of Planning and the Asian Development Bank.

PERSONNEL

A total of 79 regular bureau personnel were recruited from the various divisions to compose the Task Force that trained the Census Officers and served as resource persons during the operation. This Task Force was trained by the Chief Trainers who were ranking personnel of the bureau involved in the planning and preparatory phases of the census work.

Every province had a provincial census officer or officer-in-charge who supervised the field operations, assisted by well-trained central office personnel. For the entire country, there were 2,297 public school principal teachers designated as supervisors, and 66,722 public school teachers who served as enumerators during the census enumeration. Coordinating the activities of all the field force was an Operations Unit with its staff from the Manila Office.

CENSUS BOARDS

The Presidential Census Coordinating Board (PCCB) which was created by Executive Order No. 211, was responsible for the systematic coordination of government agencies and instrumentalities involved in the census effort. The Census Director was named Executive Officer of the PCCB, with the Executive Secretary as Chairman and the Secretary of Commerce and Industry as Vice-chairman. Represented in the PCCB were the Departments of Commerce and Industry, National Defense, Education, Public Works and Communication, Agriculture and Natural Resources, Health, the Presidential Assistant on Community Development and the Presidential Economic Staff.

As counterpart of the PCCB at the local government level, there were also established Provincial, City and Municipal Census Boards which provided such assistance and facilities as were required during the field enumeration.

The Provincial Census Board was composed of the Provincial Governor as Chairman, and the Division Superintendent of Schools, Senior District Highways Engineer, PC Provincial Commander, Provincial Health Officer, Provincial PACD Official and the Provincial Agriculturist as members.

EXPLANATORY TEXT

The City Census Board was composed of the City Mayor as Chairman, and the City Superintendent of Schools, City Engineer and the City Health Officer, as members.

The Municipal Census Board was composed of the Municipal Mayor as Chairman and the Supervisor/Principal Teacher, Municipal Health Officer, Municipal Agriculturist and the Municipal PACD Officer, as members.

Each board had a secretariat headed by an executive officer who was the Census Officer and membership was comprised of personnel detailed from the different government agencies, instrumentalities, government-owned or controlled corporations as well as from the local governments.

ESTABLISHMENT OF ENUMERATION AREAS

For census purposes, the country was divided into 38,522 enumeration districts (ED's). An ED is a specified area, the enumeration of which can be finished by one enumerator within an allotted period of time; usually it has a population from 800 to 1,200 persons. However, as a result of the decision to undertake the census enumeration in 10 days instead of 20, as originally planned, most of these ED's were split into two or more parts, each part assigned to one enumerator.

METHOD OF ENUMERATION AND USE OF SAMPLING

The enumeration of the population was done by personal interview. Each enumerator visited the households within his ED of assignment and obtained the information called for in the population schedules. If the household was an ordinary household (non-sample), the head or any responsible member was interviewed using PH Form 2; if a sample household, the respondent was interviewed using PH Form 2A.

All households were asked items relating to the personal characteristics of every member of the household, such as relationship to head, sex, age, marital status, citizenship, mother tongue, school attendance and highest grade completed. However, for every 20th household (5 percent), additional items on literacy; ability to speak Pilipino, Spanish, or English; religion; place of residence in February 1960 and May 1965; items on the labor force, including employment, industry and occupation for persons 10 years old and over; and items on fertility for ever-married women were asked by the enumerators (see "Population Items of Data Collected").

PLACE WHERE ENUMERATED

The population were enumerated in their usual place of residence. Usual place of residence is the geographic place (barrio, municipality or province) where the enumerated person usually resides. This may be the same as or different from the place where he was found at the time of the census. As a rule, it is the place where he usually sleeps.

POST-ENUMERATION SURVEY

A Post Enumeration Survey (PES) was conducted by the Bureau from May 25 to June 5, 1970, to measure coverage and content errors in the main enumeration.

The PES was conducted independently from the main enumeration by 503 especially selected and trained teacher enumerators under the supervision of 31 Task Force personnel from the Manila Office, who were trained by the members of the Sampling Committee which designed and planned the PES operation in coordination with key officials of the Population and Demography Divisions and the Operations Unit.

A simple two-stage sampling design was utilized. Enumeration districts and households constituted the primary and secondary sampling units, respectively. A total of 503 ED's were taken as samples and these were allocated to the 67 provinces in proportion to their 1970 projected population. However, all Mindanao provinces, except Camiguin, were allotted at least 8 ED's each, while the Visayas and Luzon provinces at least 4 ED's each.

Two general forms were used, PH-PES Form 6 (listing form) and PH-PES Form 7 (sample household schedule). In each of the selected sample ED's, an independent and complete listing of all households was made and this served as the frame for the selection of a 10 percent sample of the households. The selection of households was done by systematic sampling with a random start.

CONTENT AND COVERAGE

Comprising this report are 61 tables presented in four parts as follows:

	No. of tables
Number of inhabitants	9
Economic Characteristics	16
Social Characteristics	22
Marital Status	3
Education and Literacy	8
Mother Tongue	3
Citizenship	3
Ability to Speak Pilipino, English and Spanish	2
Religion	3
Demographic Characteristics	14
Fertility	8
Migration	6

Tables based on a 5 percent sample may contain figures in the distribution of a certain characteristic which do not correspond to the figures in the distribution of the same characteristic in the tables on a 100 percent basis. However, the totals in the tables based on a 5 percent sample and on 100 percent are the same.

EXPLANATORY TEXT

The coverage of the population enumerated in the census and the size of the sample are shown below:

Topic	Table No.	Coverage	Size of sample (percent)
I. Number of Inhabitants	1-8	Household and institutional population	100
	9	Household population	5
		Institutional population	100
II. Economic characteristics	1-16	Household population	5
III. Social characteristics			
A. Marital status	1-2	Household and institutional population	100
	3	Household population	100
B. Education and Literacy	4-5	Household population	5
		Institutional population	100
	6-11	Household and institutional population	100
C. Others	12-17	Household and institutional population	100
	18-22	Household population	5
		Institutional population	100
IV. Demographic characteristics			
A. Fertility	1-8	Household population	5
B. Migration	9-14	Household population	5

EXPLANATORY TEXT

On the other hand, the items of data collected and percent of the population for which these items were asked are indicated below:

POPULATION ITEMS OF DATA COLLECTED

Item number	Item	Items col- lected for 100 percent of the household population	Items col- lected for 5 percent of the household population	Items col- lected for 100 percent of the institutional population
P 2	Relationship to head of household . . .	x	—	x
P 3	Sex	x	—	x
P 4	Age at last birthday	x	—	x
P 5	Marital Status	x	—	x
P 6	Country of Citizenship	x	—	x
P 7	Mother Tongue	x	—	x
P 8	School Attendance since July 1969 . . .	x	—	x
P 9	Highest grade completed	x	—	x

P 33	Number of children born alive	—	x	—
P 34	Number of children now living	—	x	—

EXPLANATORY TEXT

DEFINITION OF TERMS AND CONCEPTS

The following terms and concepts were used in the conduct of the census enumeration —

URBAN AND RURAL AREAS

The following concepts were followed in classifying areas as urban in the 1970 Population Census:

- I. In their entirety, all cities and municipalities having a population density of at least 1,000 persons per square kilometer.
- II. Poblaciones or central districts of municipalities and cities which have a population density of at least 500 persons per square kilometer.
- III. Poblaciones or central districts (not included in I and II), regardless of the population size, which have the following:
 - a. Street pattern, i.e., network of streets in either parallel or right-angle orientation;
 - b. At least six establishments (commercial, manufacturing, recreational and/or personal services); and
 - c. At least three of the following:
 - (1) A town hall, church or chapel with religious services at least once a month;
 - (2) A public plaza, park or cemetery;
 - (3) A market place or building where trading activities are carried on at least once a week; and
 - (4) A public building like a school, hospital, puericulture and health center or library.
- IV. Barrios having at least 1,000 inhabitants which meet the conditions set forth in III above, and where the occupation of the inhabitants is predominantly non-farming fishing.

All areas not covered in the definition of urban places are considered rural.

In the 1960 census the following areas were considered urban:

- I. In their entirety, all municipal jurisdictions which, whether designated as chartered cities, provincial capitals or not, have a population density of at least 1,000 persons per square kilometer. The whole of Quezon, Baguio and Cebu cities, notwithstanding the minimum density rule, are to be included.
- II. For all other cities and municipalities with a population density of at least 500 persons per square kilometer, only the poblacion (regardless of population size) is to be considered; any barrio having at least 2,500 inhabitants and any barrio contiguous to the poblacion with at least 1,000 inhabitants. For cities where the poblacion is not specified, the central district or the "city proper" (e.g., for Davao—Bucana (1) Davao Proper (2) and Molave (3) shall be regarded as the poblacion.
- III. For other cities and municipalities with a population of at least 20,000 persons, only the poblacion (regardless of population size) and all barrios having at least 2,500 inhabitants and contiguous to the poblacion.
- IV. All other poblaciones having a population of at least 2,500 persons.

USUAL PLACE OF RESIDENCE

The usual place of residence is the geographic place (street, sitio, barrio, municipality or province) where the enumerated person usually resides. This may be the same as or different from his legal residence, or the place where he was at the time of the census. As a rule, it is the place where he lives and sleeps most of the time.

HOUSEHOLD

Usually a household consists of a group of people who sleep in the same dwelling unit and have common arrangement for the preparation and consumption of food. However, a person living alone in a distinct dwelling unit is considered as one separate household. In most cases, a household consists of a related family group. In some instances, three generations may be found living together in one household. Some household members may have no relationship to the central group—boarders and servants, for example—but they are counted as part of the household if they eat and sleep or at least sleep in the same dwelling unit.

A "lodger" (who rents a room or space) is grouped with the household from whom he rents his room or space unless he has separate cooking facilities and a different entrance.

In most cases, a household may be taken to be the entire group of persons who customarily sleep in one dwelling unit. An exception, however, is that of two or more distinct family groups with independent eating arrangements who share one dwelling unit only for economy or for lack of housing facilities in the district.

PERSONS NOT LIVING IN HOUSEHOLD

These include persons in military installations, correctional and penal institutions, dormitories of schools and universities, hospitals, religious institutions and the like.

HEAD OF HOUSEHOLD

The head of household is the person who generally provides the chief source of income for the household unit. He is the adult person, male or female, who is responsible for the organization and care of the household or who is regarded as such by the members of the household.

RELATIONSHIP TO HEAD OF HOUSEHOLD

This determines how each household member is related to the head. Examples of this relationship are: wife, son, daughter, son-in-law, daughter-in-law, grandchild, other relatives (niece, nephew, aunt, uncle, etc.), not related members (boarder, servant, etc.).

USUAL MEMBERS OF THE HOUSEHOLD

These are members of the household who regard the dwelling unit presently enumerated as their home or the place where they usually sleep.

EXPLANATORY TEXT

SPECIAL AREAS

This is a classification of the living arrangements for a group of ten or more persons unrelated to the head of the household or the person in charge.

PERSONS COUNTED AND ENUMERATED

These include the following:

- a. Those present and alive at the time of the enumeration except those born after 12:01 A.M. of May 6, 1970;
- b. Those temporarily absent at the time of the enumeration for various reasons which include those:
 1. on vacation;
 2. on business;
 3. schooling below college level;
 4. confined in a hospital, if confinement is not more than six months;
 5. in the Armed Forces, if their absence is not more than six months;
 6. in jail (provincial or municipal), if their sentence does not exceed six months.
- c. Those who are temporary residents or who are not certain they will be enumerated in their usual residence;
- d. Employees and domestics who live with the household, or at least sleep in the same unit;
- e. Filipino employees and domestics employed by a foreign family, who will not be enumerated in their usual place or residence;
- f. Boarders or lodgers who regularly sleep in the same dwelling unit;
- g. Citizens of foreign countries who are students or who are employed, or who have a business in the Philippines and who are not living within the compound of any embassy, ministry, or legation and who expect to reside in the Philippines for a year or more. These include members of their families if they are in this country with them and who are also expected to reside in the Philippines for more than a year; and
- h. All those who are alive on May 6, 1970 (12:01 A.M.) but who subsequently died prior to the date of enumeration.

FAMILY NUCLEUS

A family nucleus is restricted to a married couple or parents and their never-married children in the same household, that is, to the conjugal family nucleus. A conjugal family nucleus consists of any of the following:

- a. a married couple without children;
- b. a married couple with one or more never-married children;
- c. one parent (either father or mother) with one or more never-married children.

AGE

This is the age of the person on his last birthday as of Census Day, May 6, 1970, in completed years. When the age of a person is not reported in the form, it is estimated on the basis of other available information such as marital status, school attendance, employment status and age of other members of the family.

CITIZENSHIP

A person's citizenship depends on the country to which he owes legal allegiance. If the father is a foreigner and the mother is a Filipino, infants or minor children follow the citizenship of their father.

MARITAL STATUS

This refers to the following:

- a. **Single** — denotes a person who has never been married.
- b. **Married** — denotes a person legally married, either living together with spouse at the time of the census or temporarily separated owing to work, illness, or service in the Armed Forces or a person who lives with someone as man and wife, whether legally married or not.
- c. **Widowed** — denotes a married person whose spouse died and up to the census taking has not remarried.
- d. **Separated** — denotes a person permanently separated from the spouse, legally or otherwise, because of marital discord or some other reasons. "Separated" in this sense, does not mean separated because of husband's military service duty, hospitalization, etc., which would separate the couple from each other temporarily.
- e. **Divorced** — denotes a person who is granted such status through a court decree.

AGE AT FIRST MARRIAGE

This refers to the age when a woman first entered married life or her first consensual union (even if she were married more than once). Marriage here may either be a legal or consensual union (where the man and woman decide to live together without benefit of clergy or civil ceremony). Age refers to the particular age when a woman first had her marriage consummated. In a consensual union, the age at first marriage refers to the date when the couple started living together.

MOTHER TONGUE

This refers to the dialect spoken in a person's home in earliest childhood. Aside from Pilipino, which is the national language, among the principal dialects spoken are: Cebuano, Tagalog, Hiligaynon (Ilongo-Visayan), Ilocano, Bicol, Samar-Leyte, Pangasinan and Pongasinan.

ABLE TO READ AND WRITE

A person is able to read and write when he can read and write a simple message in some language or dialect.

SCHOOL ATTENDANCE

This means attendance in schools or colleges, public or private, including night schools, which can advance a student in the regular curriculum recognized by the school system. This excludes attendance in vocational schools such as schools for dressmaking, beauty culture, hair science, watch repairing, or motor-vehicle driving. It also excludes attendance in nursery schools. In general, training received by mail from correspondence schools is excluded. If, however, correspondence courses were given by a regular school, such as a university, and they are counted toward promotion in the regular school system, such schooling is included.

EXPLANATORY TEXT

HIGHEST GRADE COMPLETED

This refers to the highest grade or year completed in any school, college or university.

HIGHEST DEGREE OBTAINED IN COLLEGE

This is the highest degree received after having completed a course of study at the college level of education. Information on the degree received includes the title of the highest degree, diploma or certification received, or an indication of the field of study, if the title does not make this clear.

RELIGION

A person, infant or adult, who is not yet baptized carries the religious affiliation of his brothers and sisters or, if an only child, that of his mother.

CHILDREN BORN ALIVE

These children are all live-born, whether legitimate or illegitimate, or whether born of the present or prior marriage, and regardless of whether they are living or dead at the time of the census, or living elsewhere.

CHILDREN NOW LIVING

These children born to the woman concerned (whether legitimate or illegitimate, or whether born of the present or of prior marriages) are still living at the census date, regardless of their age or where they reside.

PREVIOUSLY MARRIED WOMAN

This refers to a woman who has already entered married life. Marriage here may either be legal or consensual union.

VOCATIONAL OR TECHNICAL SKILL

The vocational or technical skill possessed by individuals is gained either through schooling, training, or experience. These persons are engaged in craft or manual operation which requires the exercise of considerable initiative, independent judgment and adequate knowledge under varying work conditions. In addition, they show proficiency or technical ability in any art, science, or handicraft demonstrated by ease or expertise in performance or application.

REFERENCE WEEK

The data on the economic activities of persons 10 years old and over relate to the calendar week preceding the enumerator's visit, thus the reference week is not the same for all respondents because not all persons were enumerated during the same week. The majority of the population was enumerated during the 10-day period from May 6 to May 16, 1970.

ECONOMICALLY ACTIVE

The economically active household population includes all persons classified as employed or unemployed.

EMPLOYED

Employed persons comprise all population of households 10 years old and over who, during the preceding week of enumeration, were either

- (a) working for pay or for profit or without pay in the family farm or enterprise, or
- (b) not working but had a job or business from which they were absent.

UNEMPLOYED

Persons in the household 10 years old and over are classified as unemployed if they were not at work during the reference week but were wanting and looking for work or would have been looking for work except that:

- (a) they were temporarily ill, or
- (b) they believed no work was available.

NOT ECONOMICALLY ACTIVE

Persons living in households and considered not economically active are those 10 years old and over who are not classified as employed or unemployed. Persons not economically active are further classified in this report into the following categories: (1) housekeeper, (2) student, (3) others.

HOUSEKEEPER

A housekeeper is a person who does housekeeping chores in one's house such as cooking, cleaning the house, and laundering for family members of the household. This does not include work around the house as painting one's house, fencing the home lot, cutting the lawn, etc. Persons doing this type of work are reported under "Others."

STUDENT

A student is a person enrolled in a school or college and is not considered economically active during the week prior to his enumeration. A working student is classified as "economically active" rather than "student" even though he spends more time in school than in his work.

OTHERS

"Others" may include persons doing any of the following activities:

- a. Retired or do not want to work
- b. Unable to work (because of physical disability or ill-health)
- c. Persons working without pay but not on family farm or enterprise, volunteer workers or persons doing such work as painting the house, fencing the yard, etc., in their own homes.

CLASS OF WORKER

(1) The allocation of a person to a particular class of worker category is basically independent of the occupation or industry in which he works.

(2) The class of worker information refers to the same job described in the occupation and industry columns. The classification by class of worker consists of the following categories:

1. Wage and salary worker
 - (a) Private employee—working for a private employer for wage, salary, commission, tips, etc.
 - (b) Government employee—working for government or government owned or controlled corporations.
2. Own business
 - (a) Self-employed—working in one's business, farm, profession or trade for profit or fee, without paid employees.
 - (b) Employer—working in one's business, farm, profession or trade for profit or fee, with one or more paid employees.
 - (c) Unpaid family worker—working without pay on family farm or enterprise.

EXPLANATORY TEXT

EXPERIENCED WORKER

A person who has worked or has been employed for two consecutive weeks, with or without a formal training, is an experienced worker.

OCCUPATION

Occupation refers to the kind of work done during the reference week by person employed or the last work done by the unemployed but experienced worker, irrespective of the class of worker or industry in which the person is classified. Persons looking for work for the first time do not have any occupation and are therefore classified under a separate category.

USUAL OCCUPATION

This refers to the specific job or occupation performed by the person in the establishment, office, farm, etc., as farmer, typist,

stenographer, lawyer, physician, etc. This is the work a person has undertaken for the last twelve months before the census taking. Occupation here includes such usual activities as house-keeping in one's own house or studying and such status as disabled and retired.

INDUSTRY

Industry refers to the activity of the establishment in which an economically active person worked during the reference week, or in the case of an unemployed but previously employed, to the activity of the establishment where he worked last. Therefore persons looking for work for the first time do not have any industry and are separately classified.

Part II — HOUSING

INTRODUCTION

The **Census of Housing** was taken simultaneously with the **Census of Population** on May 6, 1970. The housing census is the principal means of collecting basic housing statistics aimed at providing comprehensive source of statistical information for development planning, for the formulation of housing policies and programmes, as frame for sample housing surveys and supplementary inquiries and for private researchers and commercial users.

The **Census of Housing** is also intended to get characteristics of structures in which people live, i.e., all "dwelling units" in the country. All structures, including those under construction (ready for occupancy on May 6, 1970) and other places of residence were given a building serial number. The housing items (H1 to H15) were filled in only for all buildings/dwelling units in which people resided on May 6, 1970, regardless of whether they were residential or non-residential.

HOUSING ITEMS

The housing items are the same for both PH Census Form No. 2 (Ordinary household) and PH Census Form No. 2-A (Sample household).

The items asked are the following:

Item No.	
	A. Characteristics of building
1	Type of building or house
2	Number of dwelling units in building or house: occupied-unoccupied
3	Construction material of roof
4	Construction material of wall
5	Year building was built
	B. Characteristics of dwelling unit
6	Number of rooms
7	Number of households and persons occupying dwelling unit
8	Type of tenure
	C. Household conveniences
9	Ownership of radio
10	Ownership of television set
11	Ownership of refrigerator
12	Type of cooking fuel
13	Type of lighting
14	Source of drinking water
15	Type of toilet facilities

In accomplishing the housing schedule, Items 1 to 5 were asked of the first household to be enumerated in the building. Items 6 to 8 were asked of the respondent in any household in the dwelling unit, and Items 9 to 15 were asked of each household respondent in the dwelling unit.

EXPLANATORY TEXT

DEFINITION OF TERMS AND CONCEPTS

BUILDING

A building is any independent free-standing structure comprising one or more rooms or other spaces, covered by a roof and enclosed within external walls or dividing walls which extend from the foundation to the roof. It usually contains one or more rooms internally connected with one another, having a common entrance and a common exit.

DWELLING UNIT

A dwelling unit is a separate and independent place of abode intended for habitation, or one not intended for habitation but occupied as living quarters by a household at the time of the census. In most places in the country a dwelling unit is a house. It may be an apartment, a group of rooms or just one room, a barong-barong, boat or cave.

The types of buildings are:

1. Single house—a complete structure intended for a single family or household.
2. Duplex—a structure intended for two households, with complete living facilities for each. It is a single structure divided into two dwelling units by a wall extending from the floor to the ceiling.
3. Apartment or accesorio—a structure usually of several stories, made up of independent living quarters, with independent entrance from internal halls or courts. An accesorio is one or two-floor structure divided into several dwelling units, each dwelling unit having its own separate entrance from outside.
4. Barong-Barong—a shack or makeshift shelter, usually built with light materials.
5. Commercial—a building used for trade and commerce such as a store or an office building.
6. Industrial—a building used for processing or manufacturing, such as a factory plant.
7. Agricultural—any structure used for agriculture purposes, such as barn, warehouse, etc.
8. Institutional—a hospital, school, church, etc.
9. Others—any structure which does not fall into any of the above classification.

NUMBER OF DWELLING UNITS IN THE BUILDING

This includes all dwelling units that are "occupied" and those that are "unoccupied". In cases of residential compounds or private residences having one or more auxiliary buildings (in addition to the principal building) and which are used as living quarters by some members of the household, said auxiliary buildings

are treated as annexes of the principal building, and as such all the buildings in the compound are considered as one dwelling unit.

CONSTRUCTION MATERIAL OF ROOF

The kinds of materials used in the construction of the roof are:

1. Galvanized iron, including aluminum and fiberglass
2. Asbestos
3. Concrete, tile
4. Cogon
5. Nipa, anahaw, buri
6. Others (canvas, salvaged materials, billboards)

CONSTRUCTION MATERIAL OF WALL

The kinds of materials used in the construction of the wall are:

1. Concrete, including hollow blocks, adobe stone, bricks, etc.
2. Galvanized iron, including aluminum
3. Wood, including plywood
4. Bamboo, including sawali
5. Nipa, anahaw, buri
6. Others (Salvaged materials like cartons, billboards, canvas, etc.)

If the roof and walls are constructed of two or more materials, the predominant material is reported.

YEAR BUILDING WAS BUILT

This refers to the period when the extent of construction permitted occupancy for living purposes and not when begun. The year reported is the particular year when occupancy started or when the building was ready for occupancy even if not occupied.

NUMBER OF ROOMS IN THE DWELLING UNIT

This pertains to the total number of rooms in a dwelling unit. This includes the bedroom, dining room, living room, kitchen and other separate spaces used or intended for dwelling purposes. Passageways, verandas, lobbies, bathrooms and toilets are not counted as rooms.

NUMBER OF OCCUPANTS

This pertains to the total number of occupants or persons whose usual place of residence is with this dwelling unit.

The dwelling unit may contain more than one household, in which case the number of occupants includes all the members of the different households whose usual place of residence is this dwelling unit.

EXPLANATORY TEXT

TYPE OF TENURE

The type of tenure may be any of the following:

1. Owner occupied only. A dwelling unit is "owner occupied only" if the owner is one of the persons living in the unit even if he is temporarily absent.
2. Owned and a part rented out. A dwelling unit a part of which is occupied by the owner and a part rented by another, i.e., if there is a lodger.
3. Owned and part occupied free by others. A dwelling unit may be owned by one of those living in the unit even if he is temporarily absent. In addition, a part of that dwelling unit may be occupied free by another household, family, relative, lodger, etc.
4. Rented only. A unit is "rented" if rent is paid or contracted for by the occupants, in cash or in kind.
5. Rented and part occupied free by others. "Rented and part occupied free by others" is when one household rents a dwelling unit and then allows another household to occupy a portion of the same unit without paying any rental.
6. Rented and part rented out. The term applies to the occupancy of dwelling unit that is being rented by one household, but a portion of which is being sub-leased, or rented out by said household to another household, lodger, etc.
7. Occupied rent-free. A dwelling unit which is occupied by a household other than the owner's and for which no rent either in cash or in kind is paid.
8. Occupied rent-free and part rented out. This type of occupancy has the same concept as in the preceding item except that a part of the dwelling unit is being rented out to another household or party for a certain amount.

OWNERSHIP OF RADIO

This includes all sets, whether console, table or portable and whether individual unit or combined with television, phonograph, clock, etc. which are in working condition or are being repaired. Excluded are automobile radios, sending-receiving sets ("ham radio" sets), and radios which are not in working order.

OWNERSHIP OF TELEVISION SET

Only television sets in working condition are included.

OWNERSHIP OF REFRIGERATOR

Only refrigerators that are in working order and run by electricity or any kind of fuel are included. Refrigerators which are in working order but cannot be utilized because of lack of power in the locality are excluded.

KIND OF COOKING FUEL

The kinds of cooking fuel are:

1. Electricity—from whatever source of power unit
2. Kerosene (gaas)—liquid form
3. Gas (liquefied petroleum)—piped or in cylinder (E. Gasul, Rockgas, Shellane, Manila Gas, etc.)
4. Wood, including sawdust
5. Charcoal
6. Others—any kind of fuel other than those mentioned above.

TYPE OF LIGHTING

The type of lighting are:

1. Electricity—from whatever source of power unit
2. Kerosene (gaas)—whatever the nature of lamp used
3. Oil—any kind of vegetable (animal) oil other than kerosene
4. Others—any kind of fuel other than electricity, kerosene or oil, i.e., candle wax

TYPE OF WATER SUPPLY

The source of drinking water of the household may be any of the following:

1. Piped water system (Municipal, NAWASA)
2. Artesian well
3. Pump
4. Open well
5. Spring
6. Rain water
7. Lake, river, stream, etc

TYPE OF TOILET FACILITIES

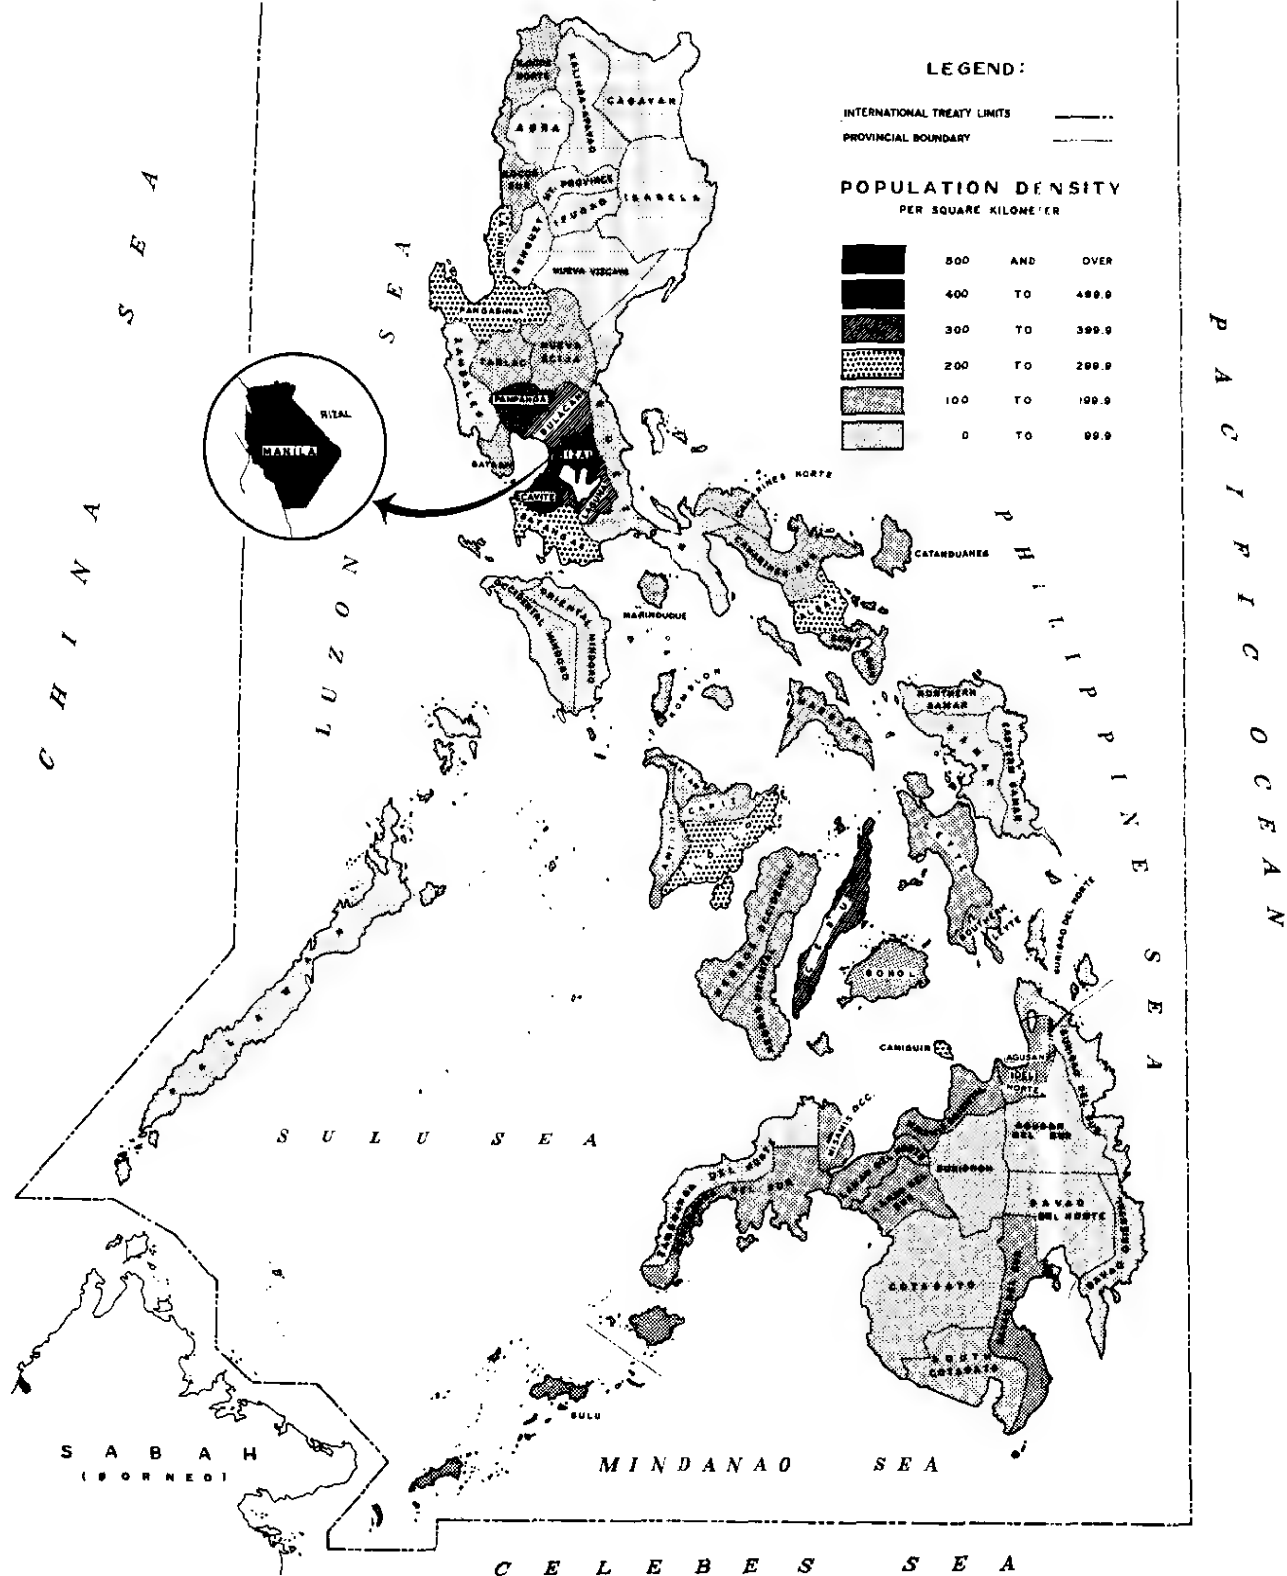

The different types of toilet facilities commonly used in buildings and houses throughout the country are the following:

1. Flush system/water-sealed—Water-sealed toilet is the type where after water is flushed or poured into the bowl a small amount is left in the bowl which seals its bottom from the pipe leading to the depository. In effect, flush toilet is one type of water-sealed toilet.

Another type of water-sealed toilet is the cement bowl with structure quite similar to an enamel bowl. It is connected to septic tank or concrete depository or sometimes drum or closed pit.

2. Antipolo system or closed pit—is a type of toilet where water is not used. It is a closed pit or a drum with a small opening on floor level or with a box-like structure which is elevated from the floor.
3. Open pit system—is a pit which is entirely open or partially covered.
4. Public toilet—is any type of toilet for communal use.

POPULATION DENSITY MAP OF THE PHILIPPINES BY PROVINCE: 1970

PHILIPPINES

INTRODUCTION

The Philippines consists of 7,100 islands located north of the equator, its boundaries defined by the South China Sea on the west, the Pacific Ocean on the east, and the Celebes Sea and the coastal waters of Borneo on the south. Of these islands 2,773 have been named while 4,327 are still unnamed. Stretching 1,841 kilometers from north to south and 1,062 kilometers from east to west it lies about 966 kilometers off the southern coast of Asia. The Batanes islands form the northernmost portion of the archipelago and the Tawi-Tawi group, the southernmost. The former is only about 128 kilometers from the southernmost tip of Taiwan and the latter 65 kilometers from British North Borneo.

While the topography of the country is generally mountainous in the interior, its coastal plains are narrow but fertile. Its mountain peaks, the highest of which are Mt. Apo in Mindanao (9,690 ft.) and Mt. Pulog in Luzon (8,841 ft.), are mostly of volcanic origin.

As of the 1970 census, 67 provinces, 1,439 municipalities, 59 cities, 21 municipal districts and 32,063 barrios comprise the Philippines. Quezon City, the official capital of the country, is located in Rizal, the most industrially advanced of the provinces.

LAND AREA AND POPULATION

The Philippines has a total population of 36,684,486 unevenly distributed over a total land area of 300,000.0 square kilometers, or an average density of 122.3 persons per square kilometer. Almost all of the inhabitants are native born (99.5%) with the foreign born comprising less than one percent (Table 1-9). Of the 7,100 islands, eleven (11) constitute 92.3 percent of the total land area. Luzon, the largest, has an area of 104,687.8 square kilometers, followed by Mindanao with 94,630.1; Samar, 13,080.0; Negros, 12,706.1; Palawan, 11,785.1; Panay, 11,515.1; Mindoro, 9,734.6; Leyte, 7,214.4; Cebu, 4,422.0; Bohol, 3,684.8; and Masbate, 3,269.0 square kilometers.

The sex structure of the population is slightly dominated by the females. For every 100 females in the country there are 99 males. Percentage-wise 50.3 percent of the populace are females and 49.7 percent are males (Table 1-7). From 1960 to 1970 the Philippine population increased by 9,596,801, or 35.4 percent. During the period in review, the country grew annually at the rate of 3.01 percent.

In point of population size, Rizal, with 2,844,689 inhabitants, ranks first among the provinces, Cebu, with 1,634,182 ranks second, followed closely by Negros Occidental with 1,503,782 while Pangasinan with 1,386,143 and Manila, 1,330,788, are fourth and fifth, respectively. Provinces ranking 6th, 7th, 8th and 9th have a population of more than 1 million each. Iloilo has 1,167,973; Cotabato, 1,136,007; Leyte, 1,110,626; and Zamboanga del Sur 1,034,018. Quezon, ranking 10th, has less than a million, or 983,324 inhabitants. In sharp contrast, the least populous, have a population of less than 100 thousand. Mountain Province is sparsely populated with only 93,112; Ifugao, 92,487; Camiguin, 63,913; and Batanes, merely 11,388. All the rest have population counts ranging from 136,249 to 948,436.

The population of Rizal represents 7.75 percent of the total Philippine population while that of Cebu and Negros Occidental put together make up 8.55 percent. On the other hand, the Batanes population constitute a mere 0.03 percent; Camiguin, 0.15 percent; Ifugao and Mountain Province, 0.25 percent each; and Kalinga-Apayao, 0.37 percent.

In the 1960 census, Rizal, Cebu, and Negros Occidental likewise occupied 1st, 2nd, and 3rd positions. Leyte, which ranked 4th, dropped to 8th place in 1970 due to the creation of its southern portion as a separate province (Southern Leyte) in July 1, 1960. Meanwhile, Pangasinan, then number 6, moved up to 4th. Manila and Cotabato, however, maintained their positions (5th and 7th) while Iloilo, then 8th, jumped to 6th. Although Zamboanga del Sur and Quezon previously ranked 12th and 14th, both experienced an unprecedented upsurge in population during the intercensal period, consequently displacing Davao and Samar from 9th and 10th, respectively. Like Leyte, the two provinces also suffered loss of territory when each was split into three provinces.

According to density, however, Manila populated by 34,746.4 persons per square kilometer, ranks foremost. Rizal, with 1,529.7 is a far second while Pampanga and Cavite are third and fourth, respectively, with 416.0 and 404.0. In 1960 Manila and Rizal held the same ranks, with 29,728.7 and 783.2, respectively. The third and fourth positions, however, were then occupied by Cavite with 293.7 and Laguna with 268.3. Pampanga, then number 6 with a density of 283.1, experienced a rapid increase in population during the intercensal years, that by 1970, the province had outranked both Cavite and Laguna.

While the aforementioned provinces have very dense populations, Palawan, Kalinga-Apayao, Agusan del Sur, and Occidental Mindoro present a sharp contrast. Extremely low densities are recorded for each of these provinces: 15.9 for Palawan; 19.3 for Kalinga-Apayao; 19.5 for Agusan del Sur; and 24.5 for Occidental Mindoro.

HOUSEHOLDS AND CONJUGAL FAMILY NUCLEI

An aggregate of 6,163,128 households and 6,435,676 conjugal family nuclei are reported for the whole country. On the average each household is composed of 5.9 persons and each conjugal family nucleus, of 5.7 persons (Table 1-6).

URBAN-RURAL RESIDENCE

The country is still predominantly rural. More than two-thirds or 68.2 percent of the populace reside in rural areas and less than one-third, or 31.8 percent, in urban areas. While the females slightly outnumber the males in the urban areas, the reverse is true in the rural areas. Of the urban residents 51.4 percent are females and 48.6 percent, males as compared to 49.7 percent and 50.3 percent, respectively, of the rural residents (Table 1-7).

AGE COMPOSITION

Although more than half (51.4%)¹ of the Philippine population belong to the productive or working ages (15 to 64 years), the country has a considerably high proportion of the youth population. Over two-fifths, or 45.7 percent are 0 to 14 years of age and only 2.9 percent, 65 years old and over. Put together, the young and older age groups make up 48.6 percent, accounting for the high dependency ratio in the country. For every 100 persons in the productive or working ages, 94 are considered "dependents". The median age of the population is 15.8 years,¹ that is, half are under the age and the other half, over it.

Comparatively, the urban areas have a much older population than the rural areas. In the former 42.1 percent are the young age group, 55.1 percent, in the productive ages; and 2.8 percent

¹ Figures used in the Final Provincial Reports were based on the Advanced Report of the National Summary.

PHILIPPINES

the older age group, while in the latter the respective figures are 7.4 percent, 49.7 percent, and 2.9 percent. Thus, while the dependency ratio in the urban areas is 81, that in the rural areas is 101 (Table I-7).

ECONOMICALLY ACTIVE POPULATION

Out of 25,122,640 persons aged 10 and over 49.0 percent are economically active while 50.8 percent are considered not economically active. A great majority (92.3%) of those in the economically active category are employed, with the unemployed comprising less than percent (7.7%). Among the unemployed 55.7 percent are seeking work for the first time. Of those not economically active, housekeepers make up 51.5 percent; students, 11.6 percent; and "others", 36.9 percent (Table II-1).

CLASS OF WORKER

Over two-fifths, or 41.7 percent of the 11,775,286 experienced workers in the country are working for wages and salaries. About 18.1 percent are in their own business and 19.8 percent are unpaid family workers (Table II-3).

The private sector employs a large proportion (82.7%) of the wage and salary workers while the government absorbs the remaining 17.3 percent. On the other hand, almost all of those working in their own business are self-employed (96.5%).

INDUSTRY

The Philippines is basically an agricultural country, despite great strides in industrialization. More than half, or 53.8 percent of the experienced workers are engaged in agriculture, hunting, forestry and fishing, with only 16.4 percent in services and 11.9 percent in manufacturing. Less than one-tenth (7.3%) are engaged in commerce, while merely 4.4 percent are in transport, communication and storage and 3.9 percent, in construction (Table II-6).

Four-fifths (80.5%) of the agricultural workers are males and only one-fifth (19.5%) are females (Table II-1).

OCCUPATION

Out of 11.7 million experienced workers in the country, 53.1 percent are farmers, fishermen, hunters, loggers and related workers by occupation. Craftsmen, production process workers and laborers comprise 14.4 percent; service, sports and related workers, 7.6 percent; sales workers, 6.8 percent; and professional, technical and related workers, 5.7 percent. A few are workers in transport and communication (4.3%), clerical workers (3.2%), and stevedores and related freight handlers (2.2%), while the rest are distributed over the other minor occupations (Table II-7).

NUMBER OF HOURS WORKED

Of the total employed workers, 48.6 percent worked for 45 hours and over during the reference week. While 30.5 percent rendered 35-44 hours work, nearly the same proportion worked for 15-34 hours (9.2%) as those who reported having worked 15-24 hours (8.9%). The smallest percentage (2.4%), however, represented those with less than 15 hours (Table II-13).

USUAL OCCUPATION

By usual occupation or activity during the last twelve months preceding May 6, 1970, farmers, hunters and loggers constitute more than 6.5 million, or 52.9 percent of the total economically active populace. Craftsmen, production process workers and laborers rank a poor second, with only 13.9 percent, followed by service, sports and related workers with 7.7 percent; professional, technical and related workers, 6.4 percent; and sales workers, 6.2 percent. A number are in transport and communication (4.4%) and in the clerical service (3.1%), while a few are stevedores, freight handlers and related workers (2.4%). The rest are administrative, executive and managerial workers (1.1%), members of the Armed Forces (0.5%), miners and quarrymen (0.3%), and workers whose usual occupation are unspecified (1.1%) (Table II-16).

MARITAL STATUS

Nearly 25 million (24,953,049) of the total population are 10 years old and over, of which the never married constitute 48.3 percent and the married, 47.0 percent. Only 4.0 percent are widowed and less than one percent (0.5%) divorced or separated.

Half of the males (50.4%) have never married as compared to 46.3 percent of the females. About the same proportion of either sex however, are married with 47.0 percent for the males and 47.2 percent for the females. However, more females (5.8%) than males (2.1%) are found in the widowed category (Table III-1).

LITERACY AND EDUCATION

Among the population aged 6 and over, 76.4 percent are literate or "able to read and write" a simple message. The level of literacy is very much higher in the urban areas where 86.6 percent of the population in the same age group are literate, compared to 71.5 percent in the rural areas (Table III-4).

Comprising the population 25 years old and over are 12,696,808 persons more than half (56.1%) of whom have completed at least a year of elementary education. However, only 14.1 percent have gone through high school and 9.5 percent, college, while 19.7 percent have not finished any grade at all (Table III-6).

Comparatively, the urban populace belonging to this age bracket are better educated than their rural counterparts. In the urban areas 45.5 percent have had an elementary education; 24.1 percent, high school; and 20.9 percent, college. Most of those in the rural areas have completed an elementary education (61.3%), with only 9.3 percent having finished a year or more in high school and 4.0 percent, college. One-fourth (24.9%) out of 8,553,600 persons in the rural areas have not had any formal schooling, compared to 9.0 percent in the urban areas.

A smaller proportion of the population 6 years old and over are attending than not attending school. Out of 29.6 million persons falling under this age bracket, only 28.1 percent are in school while 71.9 percent are out of school (Table III-9). Of those attending school 8,168,759 are between the ages of 6 to 24, representing 48.3 percent of the total population in this age group. Half of those attending school in the 6-24 year age bracket are males (49.9%) and the other half are females (50.1%).

PHILIPPINES

HOLDERS OF COLLEGE DEGREE

A dearth may be observed in the number of professionals in the country. Of the total population, a mere 3.0 percent are college graduates, most of whom have specialized in the field of education. Holders of a degree in Education and Elementary Education, including those with an Elementary Teacher's Certificate, comprise more than two-fifths (44.1%) of the 1,183,760 professionals in the country. Nearly 261 thousand, or 24.1 percent are in the Social Sciences, particularly commerce, while a few are in the Medical Sciences (8.2%) and in Engineering (8.0%). Among the less saturated fields of study are Law with 4.0 percent and the Humanities with 3.7 percent. Surprisingly, despite the Philippines being a highly agricultural country, merely 1.6 percent hold a degree in Agriculture, which is only slightly higher than those with a Fine Arts degree (1.1%). The Natural Sciences, with barely one percent (0.6%), attract the least number of college students (Table III-10).

Comparatively, the females dominate the field of Education with 60.5 percent out of 603,145 female professionals as compared to 23.6 percent of the 480,615 males. On the other hand, more males than females are in the Social Sciences and Engineering, with 30.1 percent and 16.1 percent, respectively. In sharp contrast the corresponding figures for the females are 19.2 percent and 0.8 percent, showing that the field of Engineering is still a male domain. While there is likewise a predominance of females in the Medical Sciences (10.5%) especially in Nursing, the reverse is true in the field of Law, where they constitute merely 0.7 percent. Among the males 5.2 percent are in the Medical Sciences and 8.2 percent in Law.

MOTHER TONGUE

Tagalog, spoken by almost one-fourth (24.5%) of the population and Cebuano, by about the same number (24.2%), are the two principal dialects in the country. Iloco is being spoken by 11.3 percent; Hiligaynon, 10.2 percent; Bicol, 6.8 percent; Samar-Leyte (Waray-Waray), 4.8 percent; Pampango, 3.3 percent; and Pangasinan, 2.3 percent. The remaining 12.6 percent speak one of several other dialects in the Philippines (Table III-15).

Tagalog is primarily the major mother tongue in the urban areas where 43.3 percent speak the dialect as compared to only 15.6 percent in the rural areas. Cebuano, which ranks first (27.0%) among the dialects in the rural areas is being spoken by 17.9 percent in the urban areas. While more people likewise speak Hiligaynon (9.4%) than Iloco (7.7%) in the urban areas, the reverse is true in the rural areas where 13.0 percent speak Iloco and 10.6 percent, Hiligaynon.

More than half (55.2%) of the Philippine populace are able to speak Pilipino, the national language of the country. While over two-fifths, or 44.7 percent, are able to speak English, only 3.6 percent are able to speak Spanish (Table III-18).

RELIGION

The Philippines is predominantly a Roman Catholic country. Roman Catholicism, with a following of 31,169,488, or 84.4 percent of the total population, leads all other religions. Islam, which has over 1.5 million followers, constitute only 4.3 percent; Aglipayan, 1.4 million; or 3.9 percent; Protestantism, 1.3 million, or 3.1 percent; "others", 1.7 percent; and Iglesia ni Cristo, 1.3 percent. Barely one percent (0.7%) are without any religious affiliation while an insignificant 0.1 percent are adherents of Buddhism (Table III-20).

FERTILITY

An average of 5.4 children are born alive to ever-married women in the country who have reached the end of their childbearing period (50 years and over). Ever-married women in the urban areas, however, appear to be less fertile than their rural counterparts, with an average of 5.1 children as compared to 5.4 for the latter (Table IV-1). In the same age group, 7.5 percent of 1,917,785 ever-married women have had no children by the end of their reproductive period. The proportion of ever-married women falling under this category is slightly higher in the urban (7.9%) than in the rural areas (7.3%). On the other hand, the average number of children born to ever-married women who have already borne at least one child is 4.5, although slight variations may be noted between those in the urban (4.2%) and in the rural areas (4.6%).

Filipino women tend to marry early. Nearly three-fifths (59.3 percent) of the 7,551,740 ever-married women were married by the age of 20 and 87.9 percent, by the age of 25 (Table IV-2). It is interesting to note that over one-third (34.7%) of the total ever-married women were married between the ages of 18 to 20.

MIGRATION

Three-fourths (75.2%) of the total population live in the same municipality where they were born. A few (7.1%) reside in a municipality other than the municipality of birth, but in the same province, while 17.2 percent live in a province other than the province of birth. The foreign-born population constitute a negligible percentage (0.2%), smaller than those whose place of birth is unspecified (0.3%) (Table IV-9).

Among the 10-year-old and over population 83.5 percent are residents of the same municipality where they were residing in 1960. Only 5.2 percent live in a municipality other than the municipality where they resided during the last decade, though within the same province. However, 10.6 percent were residents of a province other than the present province of residence (Table IV-10).

PHILIPPINES

Between the urban and the rural areas, however, there is more mobility among the inhabitants in the former than in the latter areas. Among the urban residents aged 10 and over, 76.4 percent live in the same municipality as the municipality of residence in 1960, while 17.2 percent reside in a province different from the province of residence in 1960. On the other hand, the corresponding figures for their rural counterparts are 87.2 percent and 7.3 percent, respectively. No marked difference, however, may be noted for residents of municipalities other than those in 1960, but within the same province, with 5.1 percent for the urban and 5.2 percent for the rural areas (Table IV-11).

NUMBER OF DWELLING UNITS

The May 1970 Census reports a total of 6,099,844 dwelling units in the Philippines. Of this figure 98.5 percent are occupied and 1.5 percent are unoccupied (Table I). The rural areas claim 99.8 percent of the dwelling units; the urban areas, 30.2 percent.

Majority (88.5%) of the dwelling units are found in the single house type of structure. Apartment or accessorias house 3.8 percent of the dwelling units; duplex houses, 3.2 percent; barong-barong or lakeshift shelters, 3.6 percent; commercial, agricultural, industrial and institutional buildings, 0.9 percent.

In both urban and rural areas the single house type of building prevails, housing 77.9 percent and 93.1 percent of the dwelling units, respectively. The only marked difference is in the proportion of dwelling units found in apartments or accessorias which house 11.2 percent of the urban dwelling units compared to only 0.6 percent of the rural dwelling units.

TYPE OF CONSTRUCTION MATERIAL OF ROOF AND WALL

The use of any particular construction material either for walls or roof is primarily affected by its supply and acquisition costs. In this connection, wood, with its relatively adequate supply and lower cost, is the most widely used walling material. Of the total number of dwelling units, 46.3 percent utilize this material (Table 2). Next in preference is bamboo, used in 25.3 percent. The other walling materials used are: concrete, in 8.6 percent of the dwelling units; galvanized iron, in 1.1 percent; and nipa, in 16.3 percent.

In the urban areas preferences are for wood (used in 61.0% of the dwelling units) and concrete (in 20.2%). In the rural areas with its bountiful forestry products, the widely used are wood (40.0%), bamboo (in 32.3%) and nipa (20.1%).

For roofing materials, 42.4 percent (of dwelling units) utilize aluminum or galvanized iron. More than a third (36.5%) use nipa; 18.5 percent, cogon; 0.7 percent, tile or concrete and 0.3 percent, asbestos. The two most common roofing materials in the urban areas are aluminum/galvanized iron and nipa with 68.6 percent of the dwelling units using the former and 25.3 percent, the latter. In the rural areas the more widely utilized are nipa (in 41.4%), aluminum/galvanized iron (in 31.1%) and cogon (in 25.1%).

TYPE OF TENURE

Owner-occupied dwelling units (including owned and a part rented out and owned and a part occupied free by others) constitute 87.7 percent of the total number of occupied dwelling units (Table 3). Those falling under the categories rented only, rented and a part occupied free by others, and rented and a part rented out account for 8.6 percent; while the occupied rent-free and occupied rent-free with a part rented out make up 3.7 percent.

The owner-occupied dwelling units prevail in both urban and rural areas, making up 69.8 percent of the total number in the former and 95.4 percent in the latter. The only marked difference is in the rented dwelling categories which account for 25.5 percent of urban dwelling units as against only 1.2 percent of the rural.

YEAR OF CONSTRUCTION

It will be noted that most of the 6 million dwelling units are of a relatively recent vintage, with almost half or 49.2 percent having been constructed during the period 1965-1970 (Table 4). During 1955-1964, 33.7 percent were built, during 1945-1954, 12.7 percent and during the War (1942-1944), 1.1 percent. Dwelling units of prewar vintage account for 3.3 percent of the present number.

More than 70 percent of dwelling units for all types of building were constructed during the periods 1965-1970 and 1955-1964. In the barong-barong category, particularly, 72.8 percent were constructed between 1965-1970 alone. Furthermore, it is only for institutional buildings that the proportion of pre-war dwelling units exceed one-tenth (14.0%).

NUMBER OF HOUSEHOLDS IN EACH DWELLING UNIT

Households occupying one dwelling unit each total 5,882,498 or 95.4 percent of the total number which is 6,163,128 (Table 5). Households sharing a dwelling unit with another household account for 3.6 percent. Those on a three household to one dwelling unit basis make up 0.7 percent; the four household per dwelling unit, 0.1 percent. The six or more households per dwelling unit group is less than .05 percent.

Most of the households in both urban and rural areas are on a one household per dwelling unit basis (92.2 percent for the former and 96.9 percent for the latter). The multiple household type (i.e., two or more households per dwelling unit) is more prevalent in the urban areas, being more densely populated. Urban households falling under this category account for 7.8 percent of the total number against only 3.1 percent in the rural areas.

NUMBER OF ROOMS BY NUMBER OF OCCUPANTS

As shown in Table 7, most of the occupied dwelling units have either one, two or three rooms, with more than four-fifths or 81.5 percent of the total number falling into this category. Those having four rooms account for 10.6 percent of the total occupied dwelling units; five rooms, 4.3 percent; six rooms, 1.9 percent and seven or more rooms, 1.6 percent.

PHILIPPINES

The majority of occupied dwelling units in both urban and rural areas have one to three rooms, (72.8% in the former and 85.2% in the latter). It may be noted that the proportion of dwelling units having seven or more rooms in the urban areas is four times that in the rural areas (3.6% as compared with 0.9%). This may be due perhaps to the concentration of hotels, apartments, commercial and institutional buildings in the former area.

The median number of occupants per dwelling unit in the Philippines is six. For the one and two-room dwelling units, the median number of occupants is five, for the three and four room units, six occupants; the five, six and seven room units, seven occupants and those with eight and more rooms, eight occupants.

OWNERSHIP OF RADIO, TELEVISION SET AND REFRIGERATOR

Low acquisition costs make the radio the most widely owned of the three appliances studied. Almost half (48.7%) of the 6.163 million households have radios as compared to only 5.5 percent having television sets and 5.5 percent having refrigerators (Table 9).

More households in the urban than the rural areas are equipped with these conveniences. In the former 63.8 percent are with radios, 16.3 percent with television sets and 15.7 percent with refrigerators. Among rural households, 42.0 percent own radios, 0.8 percent own television sets and 1.0 percent own refrigerators.

LIGHTING FACILITIES

Kerosene is used for lighting by 4,656,640 households or 75.5 percent of the total number (Table 11). Electricity is used by 23.2 percent while oil and other fuels by 1.3 percent.

Electricity is used by 60.3 percent of urban households, compared to only 6.8 percent of their rural counterparts. On the other hand, kerosene is used by 91.7 percent of households in the latter area compared to only 39.0 percent in the former.

WATER SUPPLY

The major sources of water are the pump, used by 28.8 percent of the total households; piped water, by 24.0 percent and the open well, by 22.4 percent (Table 13). Households availing of the spring account for 11.5 percent; the artesian well, 8.5 percent; river water, 2.6 percent and lake, river, stream, etc., 2.2 percent.

More than half or 54.3 percent of urban households use piped water and 25.3 percent use the pump. In comparison, the pump and the open well are the major sources of water, servicing 30.3 percent and 29.7 percent of the rural households, respectively.

COOKING FUEL

Wood is used by 79.3 percent of the total number of households; kerosene by 10.9 percent; gas (liquefied petroleum), by 8.2 percent; electricity by 2.7 percent; charcoal and other fuels by 1.4 percent (Table 14).

In the urban areas, 49.3 percent use wood as compared to 92.4 percent in the rural areas. The other cooking fuels of urban dwellers are kerosene, used by 26.0 percent; gas (liquefied petroleum), by 15.1 percent; electricity, by 8.2 percent; charcoal and other fuels by 1.4 percent. Among the rural households, only 4.3 percent use electricity, 4.3 percent, kerosene, 1.6 percent, gas, 1.6 percent, charcoal and other fuels.

TOILET FACILITIES

Toilet facilities seem to be a most neglected phase of Philippine housing. On the national level 36.7 percent are without toilet facilities (Table 15). More than 1/5 (22.6%) make use of the flush or water-sealed type; 22.9 percent, the open pit; 15.9 percent, the antipolo or closed pit and 1.9 percent, the public toilet.

This lack is more felt in the rural areas where 45.3 percent have no toilet facility than in the urban areas where the corresponding figure is 17.2 percent. Of the total urban households, 17.2 percent use the flush or water-sealed toilet; 19.1 percent, the antipolo or closed pit; 11.9 percent, the open pit; and 3.4 percent, the public toilet. In comparison the flush or water-sealed type is used by 11.2 percent of the rural households; the antipolo or closed pit by 14.5 percent; the open pit by 27.8 percent and the public toilet by 1.2 percent.

APPENDIX

1970 PH Census Form No. 2 (Ordinary Household).	959
1970 PH Census Form No. 2-A (Sample Household)	961
1970 PH Census Form No. 5-B (Institutional Census Report).	962

EXPLANATORY TEXT

Part I — POPULATION

INTRODUCTION

The 1970 Census of Population, taken on May 6, 1970, was the first to be conducted by the Bureau of the Census and Statistics after the establishment of its local offices in almost all the provinces of the country. These field offices, which are staffed by two to ten regular employees, directed, supervised and controlled the field enumeration.

The figures in this report are based on the data collected through the schedules used during the population census enumeration, namely:

PH Census Form No. 2 (Ordinary Household) which was used in 19 out of every 20 households enumerated;

PH Census Form No. 2-A (Sample Household) which was used in 1 out of every 20 households enumerated; and

PH Census Form No. 5-B (Institutional Census Report) which was used for those living in an institution or collective living quarters, such as jail, training camp, convent, ship, dormitory, seminary, hospital, asylum, military camp, welfare institution, etc.

Most of the items in these schedules were pre-coded to relieve the enumerators of the tedious task of memorizing or of having to constantly refer to the Enumerator's Manual for the necessary codes, reduce processing costs and time, and make possible the release of advanced data within a relatively shorter period. The latest available electronic data processing machine was also utilized to process the census data and hasten the publication of the census reports.

The total population of the Philippines on Census Day, May 6, 1970, was 36,684,486. This figure includes the household population of 36,602,532 and the institutional population of 81,954.

AUTHORITY FOR THE 1970 CENSUS

Commonwealth Act 591 authorizes the Bureau of the Census and Statistics "to prepare for and undertake all censuses of population, agriculture, industry and commerce."

Executive Order No. 149, issued by the President on October 1969, originally set Sunday, February 16, 1970, as the Census Day or the date of the start of enumeration. This was later amended by Executive Order No. 211, dated February 14, 1970, resetting the Census Day to Wednesday, May 6, 1970.

ADVISORY COMMITTEE

To avail of the expert advice of organizations and individuals with technical competence and experience in specialized fields, an Advisory Committee was formed.

Represented in the Committee were the Population Institute; National Coordinating Center for the Study and Development of

Filipino Children and Youth; University of the Philippines; Philippine Statistical Center; National Economic Council; Presidential Economic Staff; Department of Labor; Regional Urban Planning Office; People's Homesite and Housing Corporation; Department of Health; Department of National Defense; National Science Development Board; Commission on National Integration; Presidential Arm on Community Development; Bureau of Private Schools; Bureau of Public Schools; Budget Commission; Philippine Statistical Association; Institute of Planning and the Asian Development Bank.

PERSONNEL

A total of 79 regular bureau personnel were recruited from the various divisions to compose the Task Force that trained the Census Officers and served as resource persons during the operation. This Task Force was trained by the Chief Trainers who were ranking personnel of the bureau involved in the planning and preparatory phases of the census work.

Every province had a provincial census officer or officer-in-charge who supervised the field operations, assisted by well-trained central office personnel. For the entire country, there were 2,297 public school principal teachers designated as supervisors, and 66,722 public school teachers who served as enumerators during the census enumeration. Coordinating the activities of all the field force was an Operations Unit with its staff from the Manila Office.

CENSUS BOARDS

The Presidential Census Coordinating Board (PCCB) which was created by Executive Order No. 211, was responsible for the systematic coordination of government agencies and instrumentalities involved in the census effort. The Census Director was named Executive Officer of the PCCB, with the Executive Secretary as Chairman and the Secretary of Commerce and Industry as Vice-chairman. Represented in the PCCB were the Departments of Commerce and Industry, National Defense, Education, Public Works and Communication, Agriculture and Natural Resources, Health, the Presidential Assistant on Community Development and the Presidential Economic Staff.

As counterpart of the PCCB at the local government level, there were also established Provincial, City and Municipal Census Boards which provided such assistance and facilities as were required during the field enumeration.

The Provincial Census Board was composed of the Provincial Governor as Chairman, and the Division Superintendent of Schools, Senior District Highways Engineer, PC Provincial Commander, Provincial Health Officer, Provincial PACD Official and the Provincial Agriculturist as members.

EXPLANATORY TEXT

The City Census Board was composed of the City Mayor as Chairman, and the City Superintendent of Schools, City Engineer and the City Health Officer, as members.

The Municipal Census Board was composed of the Municipal Mayor as Chairman and the Supervisor/Principal Teacher, Municipal Health Officer, Municipal Agriculturist and the Municipal PACD Officer, as members.

Each board had a secretariat headed by an executive officer who was the Census Officer and membership was comprised of personnel detailed from the different government agencies, instrumentalities, government-owned or controlled corporations as well as from the local governments.

ESTABLISHMENT OF ENUMERATION AREAS

For census purposes, the country was divided into 38,522 enumeration districts (ED's). An ED is a specified area, the enumeration of which can be finished by one enumerator within an allotted period of time; usually it has a population from 800 to 1,200 persons. However, as a result of the decision to undertake the census enumeration in 10 days instead of 20, as originally planned, most of these ED's were split into two or more parts, each part assigned to one enumerator.

METHOD OF ENUMERATION AND USE OF SAMPLING

The enumeration of the population was done by personal interview. Each enumerator visited the households within his ED of assignment and obtained the information called for in the population schedules. If the household was an ordinary household (non-sample), the head or any responsible member was interviewed using PH Form 2; if a sample household, the respondent was interviewed using PH Form 2A.

All households were asked items relating to the personal characteristics of every member of the household, such as relationship to head, sex, age, marital status, citizenship, mother tongue, school attendance and highest grade completed. However, for every 20th household (5 percent), additional items on literacy; ability to speak Pilipino, Spanish, or English; religion; place of residence in February 1960 and May 1965; items on the labor force, including employment, industry and occupation for persons 10 years old and over; and items on fertility for ever-married women were asked by the enumerators (see "Population Items of Data Collected").

PLACE WHERE ENUMERATED

The population were enumerated in their usual place of residence. Usual place of residence is the geographic place (barrio, municipality or province) where the enumerated person usually resides. This may be the same as or different from the place where he was found at the time of the census. As a rule, it is the place where he usually sleeps.

POST-ENUMERATION SURVEY

A Post Enumeration Survey (PES) was conducted by the Bureau from May 25 to June 5, 1970, to measure coverage and content errors in the main enumeration.

The PES was conducted independently from the main enumeration by 503 especially selected and trained teacher-enumerators under the supervision of 31 Task Force personnel from the Manila Office, who were trained by the members of the Sampling Committee which designed and planned the PES operation in coordination with key officials of the Population and Demography Divisions and the Operations Unit.

A simple two-stage sampling design was utilized. Enumeration districts and households constituted the primary and secondary sampling units, respectively. A total of 503 ED's were taken as samples and these were allocated to the 67 provinces in proportion to their 1970 projected population. However, all Mindanao provinces, except Camiguin, were allotted at least 8 ED's each, while the Visayas and Luzon provinces at least 4 ED's each.

Two general forms were used, PH-PES Form 6 (listing form) and PH-PES Form 7 (sample household schedule). In each of the selected sample ED's, an independent and complete listing of all households was made and this served as the frame for the selection of a 10 percent sample of the households. The selection of households was done by systematic sampling with a random start.

CONTENT AND COVERAGE

Comprising this report are 61 tables presented in four (4) parts as follows:

	No. of tables
Number of inhabitants	9
Economic Characteristics	16
Social Characteristics	22
Marital Status	3
Education and Literacy	8
Mother Tongue	3
Citizenship	3
Ability to Speak Pilipino, English and Spanish	2
Religion	3
Demographic Characteristics	14
Fertility	8
Migration	6

Tables based on a 5 percent sample may contain figures in the distribution of a certain characteristic which do not correspond to the figures in the distribution of the same characteristic in the tables on a 100 percent basis. However, the totals in the tables based on a 5 percent sample and on 100 percent are the same.

EXPLANATORY TEXT

The coverage of the population enumerated in the census and the size of the sample are shown below:

Topic	Table No.	Coverage	Size of sample (percent)
I. Number of Inhabitants	1-8	Household and institutional population	100
	9	Household population	5
		Institutional population	100
II. Economic characteristics	1-16	Household population	5
III. Social characteristics			
A. Marital status	1-2	Household and institutional population	100
	3	Household population	100
B. Education and Literacy	4-5	Household population	5
		Institutional population	100
	6-11	Household and institutional population	100
C. Others	12-17	Household and institutional population	100
	18-22	Household population	5
		Institutional population	100
IV. Demographic characteristics			
A. Fertility	1-8	Household population	5
B. Migration	9-14	Household population	5

EXPLANATORY TEXT

On the other hand, the items of data collected and percent of the population for which these items were asked are indicated below:

POPULATION ITEMS OF DATA COLLECTED

Item number	Item	Items col- lected for 100 percent of the household population	Items col- lected for 5 percent of the household population	Items col- lected for 100 percent of the institutional population
P 2	Relationship to head of household	x	—	x
P 3	Sex	x	—	x
P 4	Age at last birthday	x	—	x
P 5	Marital Status	x	—	x
P 6	Country of Citizenship	x	—	x
P 7	Mother Tongue	x	—	x
P 8	School Attendance since July 1969	x	—	x
P 9	Highest grade completed	x	—	x
P 10	Highest degree obtained in college	x	—	x
P 11	Able to read and write a simple message	—	x	x
P 12	Able to speak Pilipino	—	x	x
P 13	Able to speak Spanish	—	x	x
P 14	Able to speak English	—	x	x
P 15	Religion	—	x	x
P 16	Mother's residence at time of birth	—	x	x
P 17	Residence in February 1960	—	x	x
P 18	Residence in May 1965	—	x	x
P 19	Vocational or technical skill	—	x	x
P 20- 27	Employment Status	—	x	—
P 28	Occupation	—	x	x
P 29	Industry	—	x	x
P 30	Class of Worker	—	x	x
P 31	Usual occupation	—	x	—
P 32	Age at first marriage	—	x	—
P 33	Number of children born alive	—	x	—
P 34	Number of children now living	—	x	—

EXPLANATORY TEXT

DEFINITION OF TERMS AND CONCEPTS

The following terms and concepts were used in the conduct of the census enumeration —

URBAN AND RURAL AREAS

The following concepts were followed in classifying areas as urban in the 1970 Population Census:

- I. In their entirety, all cities and municipalities having a population density of at least 1,000 persons per square kilometer.
- II. Poblaciones or central districts of municipalities and cities which have a population density of at least 500 persons per square kilometer.
- III. Poblaciones or central districts (not included in I and II), regardless of the population size, which have the following:
 - a. Street pattern, i.e., network of streets in either parallel or right-angle orientation;
 - b. At least six establishments (commercial, manufacturing, recreational and/or personal services); and
 - c. At least three of the following:
 - (1) A town hall, church or chapel with religious services at least once a month;
 - (2) A public plaza, park or cemetery;
 - (3) A market place or building where trading activities are carried on at least once a week; and
 - (4) A public building like a school, hospital, puericulture and health center or library.
- IV. Barrios having at least 1,000 inhabitants which meet the conditions set forth in III above, and where the occupation of the inhabitants is predominantly non-farming fishing.

All areas not covered in the definition of urban places are considered rural.

In the 1960 census the following areas were considered urban:

- I. In their entirety, all municipal jurisdictions which, whether designated as chartered cities, provincial capitals or not, have a population density of at least 1,000 persons per square kilometer. The whole of Quezon, Baguio and Cebu cities, notwithstanding the minimum density rule, are to be included.
- II. For all other cities and municipalities with a population density of at least 500 persons per square kilometer, only the poblacion (regardless of population size) is to be considered; any barrio having at least 2,500 inhabitants and any barrio contiguous to the poblacion with at least 1,000 inhabitants. For cities where the poblacion is not specified, the central district or the "city proper" (e.g., for Davao—Bucana (1) Davao Proper (2) and Molave (3) shall be regarded as the poblacion.
- III. For other cities and municipalities with a population of at least 20,000 persons, only the poblacion (regardless of population size) and all barrios having at least 2,500 inhabitants and contiguous to the poblacion.
- IV. All other poblaciones having a population of at least 5,000 persons.

USUAL PLACE OF RESIDENCE

The usual place of residence is the geographic place (street, sitio, barrio, municipality or province) where the enumerated person usually resides. This may be the same as or different from his legal residence, or the place where he was at the time of the census. As a rule, it is the place where he lives and sleeps most of the time.

HOUSEHOLD

Usually a household consists of a group of people who sleep in the same dwelling unit and have common arrangement for the preparation and consumption of food. However, a person living alone in a distinct dwelling unit is considered as one separate household. In most cases, a household consists of a related family group. In some instances, three generations may be found living together in one household. Some household members may have no relationship to the central group—boarders and servants, for example—but they are counted as part of the household if they eat and sleep or at least sleep in the same dwelling unit.

A "lodger" (who rents a room or space) is grouped with the household from whom he rents his room or space unless he has separate cooking facilities and a different entrance.

In most cases, a household may be taken to be the entire group of persons who customarily sleep in one dwelling unit. An exception, however, is that of two or more distinct family groups with independent eating arrangements who share one dwelling unit only for economy or for lack of housing facilities in the district.

PERSONS NOT LIVING IN HOUSEHOLD

These include persons in military installations, correctional and penal institutions, dormitories of schools and universities, hospitals, religious institutions and the like.

HEAD OF HOUSEHOLD

The head of household is the person who generally provides the chief source of income for the household unit. He is the adult person, male or female, who is responsible for the organization and care of the household or who is regarded as such by the members of the household.

RELATIONSHIP TO HEAD OF HOUSEHOLD

This determines how each household member is related to the head. Examples of this relationship are: wife, son, daughter, son-in-law, daughter-in-law, grandchild, other relatives (niece, nephew, aunt, uncle, etc.), not related members (boarder, servant, etc.).

USUAL MEMBERS OF THE HOUSEHOLD

These are members of the household who regard the dwelling unit presently enumerated as their home or the place where they usually sleep.

EXPLANATORY TEXT

SPECIAL AREAS

This is a classification of the living arrangements for a group of ten or more persons unrelated to the head of the household or the person in charge.

PERSONS COUNTED AND ENUMERATED

These include the following:

- a. Those present and alive at the time of the enumeration except those born after 12:01 A.M. of May 6, 1970;
- b. Those temporarily absent at the time of the enumeration for various reasons which include those:
 1. on vacation;
 2. on business;
 3. schooling below college level;
 4. confined in a hospital, if confinement is not more than six months;
 5. in the Armed Forces, if their absence is not more than six months;
 6. in jail (provincial or municipal), if their sentence does not exceed six months.
- c. Those who are temporary residents or who are not certain they will be enumerated in their usual residence;
- d. Employees and domestics who live with the household, or at least sleep in the same unit;
- e. Filipino employees and domestics employed by a foreign family, who will not be enumerated in their usual place or residence;
- f. Boarders or lodgers who regularly sleep in the same dwelling unit;
- g. Citizens of foreign countries who are students or who are employed, or who have a business in the Philippines and who are not living within the compound of any embassy, ministry, or legation and who expect to reside in the Philippines for a year or more. These include members of their families if they are in this country with them and who are also expected to reside in the Philippines for more than a year; and
- h. All those who are alive on May 6, 1970 (12:01 A.M.) but who subsequently died prior to the date of enumeration

FAMILY NUCLEUS

A family nucleus is restricted to a married couple or parents and their never-married children in the same household, that is, to the conjugal family nucleus. A conjugal family nucleus consists of any of the following:

- a. a married couple without children;
- b. a married couple with one or more never-married children;
- c. one parent (either father or mother) with one or more never-married children.

AGE

This is the age of the person on his last birthday as of Census Day, May 6, 1970, in completed years. When the age of a person is not reported in the form, it is estimated on the basis of other available information such as marital status, school attendance, employment status and age of other members of the family.

CITIZENSHIP

A person's citizenship depends on the country to which he owes legal allegiance. If the father is a foreigner and the mother is a Filipino, infants or minor children follow the citizenship of their father.

MARITAL STATUS

This refers to the following:

- a. **Single** — denotes a person who has never been married.
- b. **Married** — denotes a person legally married, either living together with spouse at the time of the census or temporarily separated owing to work, illness, or service in the Armed Forces or a person who lives with someone as man and wife, whether legally married or not.
- c. **Widowed** — denotes a married person whose spouse died and up to the census taking has not remarried.
- d. **Separated** — denotes a person permanently separated from the spouse, legally or otherwise, because of marital discord or some other reasons. "Separated" in this sense, does not mean separated because of husband's military service duty, hospitalization, etc., which would separate the couple from each other temporarily.
- e. **Divorced** — denotes a person who is granted such status through a court decree.

AGE AT FIRST MARRIAGE

This refers to the age when a woman first entered married life or her first consensual union (even if she were married more than once). Marriage here may either be a legal or consensual union (where the man and woman decide to live together without benefit of clergy or civil ceremony). Age refers to the particular age when a woman first had her marriage consummated. In a consensual union, the age at first marriage refers to the date when the couple started living together.

MOTHER TONGUE

This refers to the dialect spoken in a person's home in earliest childhood. Aside from Pilipino, which is the national language, among the principal dialects spoken are: Cebuano, Tagalog, Hiligaynon (Ilongo-Visayan), Ilocano, Bicol, Samar-Leyte, Pangasinan and Pangasinan.

ABLE TO READ AND WRITE

A person is able to read and write when he can read and write a simple message in some language or dialect.

SCHOOL ATTENDANCE

This means attendance in schools or colleges, public or private, including night schools, which can advance a student in the regular curriculum recognized by the school system. This excludes attendance in vocational schools such as schools for dressmaking, beauty culture, hair science, watch repairing, or motor-vehicle driving. It also excludes attendance in nursery schools. In general, training received by mail from correspondence schools is excluded. If, however, correspondence courses were given by a regular school, such as a university, and they are counted toward promotion in the regular school system, such schooling is included.

EXPLANATORY TEXT

HIGHEST GRADE COMPLETED

This refers to the highest grade or year completed in any school, college or university.

HIGHEST DEGREE OBTAINED IN COLLEGE

This is the highest degree received after having completed a course of study at the college level of education. Information on the degree received includes the title of the highest degree, diploma or certification received, or an indication of the field of study, if the title does not make this clear.

RELIGION

A person, infant or adult, who is not yet baptized carries the religious affiliation of his brothers and sisters or, if an only child, that of his mother.

CHILDREN BORN ALIVE

These children are all live-born, whether legitimate or illegitimate, or whether born of the present or prior marriage, and regardless of whether they are living or dead at the time of the census, or living elsewhere.

CHILDREN NOW LIVING

These children born to the woman concerned (whether legitimate or illegitimate, or whether born of the present or of prior marriages) are still living at the census date, regardless of their age or where they reside.

EVER-MARRIED WOMAN

This refers to a woman who has already entered married life. Marriage here may either be legal or consensual union.

VOCATIONAL OR TECHNICAL SKILL

The vocational or technical skill possessed by individuals is obtained either through schooling, training, or experience. These persons are engaged in craft or manual operation which requires the exercise of considerable initiative, independent judgment and trade knowledge under varying work conditions. In addition, they show proficiency or technical ability in any art, science, or handicraft demonstrated by ease or expertise in performance or application.

REFERENCE WEEK

The data on the economic activities of persons 10 years old and over relate to the calendar week preceding the enumerator's visit, thus the reference week is not the same for all respondents because not all persons were enumerated during the same week. The majority of the population was enumerated during the 10-day period from May 6 to May 16, 1970.

ECONOMICALLY ACTIVE

The economically active household population includes all persons classified as employed or unemployed.

EMPLOYED

Employed persons comprise all population of households 10 years old and over who, during the preceding week of enumeration, were either

- (a) working for pay or for profit or without pay in the family farm or enterprise, or
- (b) not working but had a job or business from which they were absent.

UNEMPLOYED

Persons in the household 10 years old and over are classified as unemployed if they were not at work during the reference week but were wanting and looking for work or would have been looking for work except that:

- (a) they were temporarily ill, or
- (b) they believed no work was available.

NOT ECONOMICALLY ACTIVE

Persons living in households and considered not economically active are those 10 years old and over who are not classified as employed or unemployed. Persons not economically active are further classified in this report into the following categories: (1) housekeeper, (2) student, (3) others.

HOUSEKEEPER

A housekeeper is a person who does housekeeping chores in one's house such as cooking, cleaning the house, and laundering for family members of the household. This does not include work around the house as painting one's house, fencing the home lot, cutting the lawn, etc. Persons doing this type of work are reported under "Others."

STUDENT

A student is a person enrolled in a school or college and is not considered economically active during the week prior to his enumeration. A working student is classified as "economically active" rather than "student" even though he spends more time in school than in his work.

OTHERS

"Others" may include persons doing any of the following activities:

- a. Retired or do not want to work
- b. Unable to work (because of physical disability or ill-health)
- c. Persons working without pay but not on family farm or enterprise, volunteer workers or persons doing such work as painting the house, fencing the yard, etc., in their own homes.

CLASS OF WORKER

(1) The allocation of a person to a particular class of worker category is basically independent of the occupation or industry in which he works.

(2) The class of worker information refers to the same job described in the occupation and industry columns. The classification by class of worker consists of the following categories:

1. Wage and salary worker
 - (a) Private employee—working for a private employer for wage, salary, commission, tips, etc.
 - (b) Government employee—working for government or government owned or controlled corporations.
2. Own business
 - (a) Self-employed—working in one's business, farm, profession or trade for profit or fee, without paid employees.
 - (b) Employer—working in one's business, farm, profession or trade for profit or fee, with one or more paid employees.
 - (c) Unpaid family worker—working without pay on family farm or enterprise.

EXPLANATORY TEXT

EXPERIENCED WORKER

A person who has worked or has been employed for two consecutive weeks, with or without a formal training, is an experienced worker.

OCCUPATION

Occupation refers to the kind of work done during the reference week by person employed or the last work done by the unemployed but experienced worker, irrespective of the class of worker or industry in which the person is classified. Persons looking for work for the first time do not have any occupation and are therefore classified under a separate category.

USUAL OCCUPATION

This refers to the specific job or occupation performed by the person in the establishment, office, farm, etc., as farmer, typist,

stenographer, lawyer, physician, etc. This is the work a person has undertaken for the last twelve months before the census taking. Occupation here includes such usual activities as house-keeping in one's own house or studying and such status as disabled and retired.

INDUSTRY

Industry refers to the activity of the establishment in which an economically active person worked during the reference week, or in the case of an unemployed but previously employed, to the activity of the establishment where he worked last. Therefore, persons looking for work for the first time do not have any industry and are separately classified.

Part II — HOUSING

INTRODUCTION

The **Census of Housing** was taken simultaneously with the **Census of Population** on May 6, 1970. The housing census is the principal means of collecting basic housing statistics aimed at providing comprehensive source of statistical information for development planning, for the formulation of housing policies and programmes, as frame for sample housing surveys and supplementary inquiries and for private researchers and commercial users.

The **Census of Housing** is also intended to get characteristics of structures in which people live, i.e., all "dwelling units" in the country. All structures, including those under construction (ready for occupancy on May 6, 1970) and other places of residence were given a building serial number. The housing items (H1 to H15) were filled in only for all buildings/dwelling units in which people resided on May 6, 1970, regardless of whether they were residential or non-residential.

HOUSING ITEMS

The housing items are the same for both PH Census Form No 2 (Ordinary household) and PH Census Form No. 2-A (Sample household).

The items asked are the following:

Item No.	
	A. Characteristics of building
1	Type of building or house
2	Number of dwelling units in building or house: occupied-unoccupied
3	Construction material of roof
4	Construction material of wall
5	Year building was built
	B. Characteristics of dwelling unit
6	Number of rooms
7	Number of households and persons occupying dwelling unit
8	Type of tenure
	C. Household conveniences
9	Ownership of radio
10	Ownership of television set
11	Ownership of refrigerator
12	Type of cooking fuel
13	Type of lighting
14	Source of drinking water
15	Type of toilet facilities

In accomplishing the housing schedule, Items 1 to 5 were asked of the first household to be enumerated in the building. Items 6 to 8 were asked of the respondent in any household the dwelling unit, and Items 9 to 15 were asked of each household respondent in the dwelling unit.

EXPLANATORY TEXT

DEFINITION OF TERMS AND CONCEPTS

BUILDING

A building is any independent free-standing structure comprising one or more rooms or other spaces, covered by a roof and enclosed within external walls or dividing walls which extend from the foundation to the roof. It usually contains one or more rooms internally connected with one another, having a common entrance and a common exit.

DWELLING UNIT

A dwelling unit is a separate and independent place of abode intended for habitation, or one not intended for habitation but occupied as living quarters by a household at the time of the census. In most places in the country a dwelling unit is a house. It may be an apartment, a group of rooms or just one room, a barong-barong, boat or cave.

The types of buildings are:

1. Single house—a complete structure intended for a single family or household.
2. Duplex—a structure intended for two households, with complete living facilities for each. It is a single structure divided into two dwelling units by a wall extending from the floor to the ceiling.
3. Apartment or accesorio—a structure usually of several stories, made up of independent living quarters, with independent entrance from internal halls or courts. An accesorio is one or two-floor structure divided into several dwelling units, each dwelling unit having its own separate entrance from outside.
4. Barong-Barong—a shack or makeshift shelter, usually built with light materials.
5. Commercial—a building used for trade and commerce such as a store or an office building.
6. Industrial—a building used for processing or manufacturing, such as a factory plant.
7. Agricultural—any structure used for agriculture purposes, such as barn, warehouse, etc.
8. Institutional—a hospital, school, church, etc.
9. Others—any structure which does not fall into any of the above classification.

NUMBER OF DWELLING UNITS IN THE BUILDING

This includes all dwelling units that are "occupied" and those are "unoccupied". In cases of residential compounds or other residences having one or more auxiliary buildings (in addition to the principal building) and which are used as living quarters by some members of the household, said auxiliary buildings

are treated as annexes of the principal building, and as such all the buildings in the compound are considered as one dwelling unit.

CONSTRUCTION MATERIAL OF ROOF

The kinds of materials used in the construction of the roof are:

1. Galvanized iron, including aluminum and fiberglass
2. Asbestos
3. Concrete, tile
4. Cogon
5. Nipa, anahaw, buri
6. Others (canvas, salvaged materials, billboards)

CONSTRUCTION MATERIAL OF WALL

The kinds of materials used in the construction of the wall are:

1. Concrete, including hollow blocks, adobe stone, bricks, etc.
2. Galvanized iron, including aluminum
3. Wood, including plywood
4. Bamboo, including sawali
5. Nipa, anahaw, buri
6. Others (Salvaged materials like cartons, billboards, canvas, etc.)

If the roof and walls are constructed of two or more materials, the predominant material is reported.

YEAR BUILDING WAS BUILT

This refers to the period when the extent of construction permitted occupancy for living purposes and not when begun. The year reported is the particular year when occupancy started or when the building was ready for occupancy even if not occupied.

NUMBER OF ROOMS IN THE DWELLING UNIT

This pertains to the total number of rooms in a dwelling unit. This includes the bedroom, dining room, living room, kitchen and other separate spaces used or intended for dwelling purposes. Passageways, verandas, lobbies, bathrooms and toilets are not counted as rooms.

NUMBER OF OCCUPANTS

This pertains to the total number of occupants or persons whose usual place of residence is with this dwelling unit.

The dwelling unit may contain more than one household, in which case the number of occupants includes all the members of the different households whose usual place of residence is this dwelling unit.

EXPLANATORY TEXT

TYPE OF TENURE

The type of tenure may be any of the following:

1. Owner occupied only. A dwelling unit is "owner occupied only" if the owner is one of the persons living in the unit even if he is temporarily absent.
2. Owned and a part rented out. A dwelling unit a part of which is occupied by the owner and a part rented by another, i.e., if there is a lodger.
3. Owned and part occupied free by others. A dwelling unit may be owned by one of those living in the unit even if he is temporarily absent. In addition, a part of that dwelling unit may be occupied free by another household, family, relative, lodger, etc.
4. Rented only. A unit is "rented" if rent is paid or contracted for by the occupants, in cash or in kind.
5. Rented and part occupied free by others. "Rented and part occupied free by others" is when one household rents a dwelling unit and then allows another household to occupy a portion of the same unit without paying any rental.
6. Rented and part rented out. The term applies to the occupancy of dwelling unit that is being rented by one household, but a portion of which is being sub-leased, or rented out by said household to another household, lodger, etc.
7. Occupied rent-free. A dwelling unit which is occupied by a household other than the owner's and for which no rent either in cash or in kind is paid.
8. Occupied rent-free and part rented out. This type of occupancy has the same concept as in the preceding item except that a part of the dwelling unit is being rented out to another household or party for a certain amount.

OWNERSHIP OF RADIO

This includes all sets, whether console, table or portable and whether individual unit or combined with television, phonograph, clock, etc. which are in working condition or are being repaired. Excluded are automobile radios, sending-receiving sets ("ham radio" sets), and radios which are not in working order.

OWNERSHIP OF TELEVISION SET

Only television sets in working condition are included.

OWNERSHIP OF REFRIGERATOR

Only refrigerators that are in working order and run by electricity or any kind of fuel are included. Refrigerators which are in working order but cannot be utilized because of lack of power in the locality are excluded.

KIND OF COOKING FUEL

The kinds of cooking fuel are:

1. Electricity—from whatever source of power unit
2. Kerosene (gaas)—liquid form
3. Gas (liquefied petroleum)—piped or in cylinder (Esso, Gasul, Rockgas, Shellane, Manila Gas, etc.)
4. Wood, including sawdust
5. Charcoal
6. Others—any kind of fuel other than those mentioned above.

TYPE OF LIGHTING

The type of lighting are:

1. Electricity—from whatever source of power unit
2. Kerosene (gaas)—whatever the nature of lamp used
3. Oil—any kind of vegetable (animal) oil other than kerosene
4. Others—any kind of fuel other than electricity, kerosene or oil, i.e., candle wax

TYPE OF WATER SUPPLY

The source of drinking water of the household may be any of the following:

1. Piped water system (Municipal, NAWASA)
2. Artesian well
3. Pump
4. Open well
5. Spring
6. Rain water
7. Lake, river, stream, etc.

TYPE OF TOILET FACILITIES

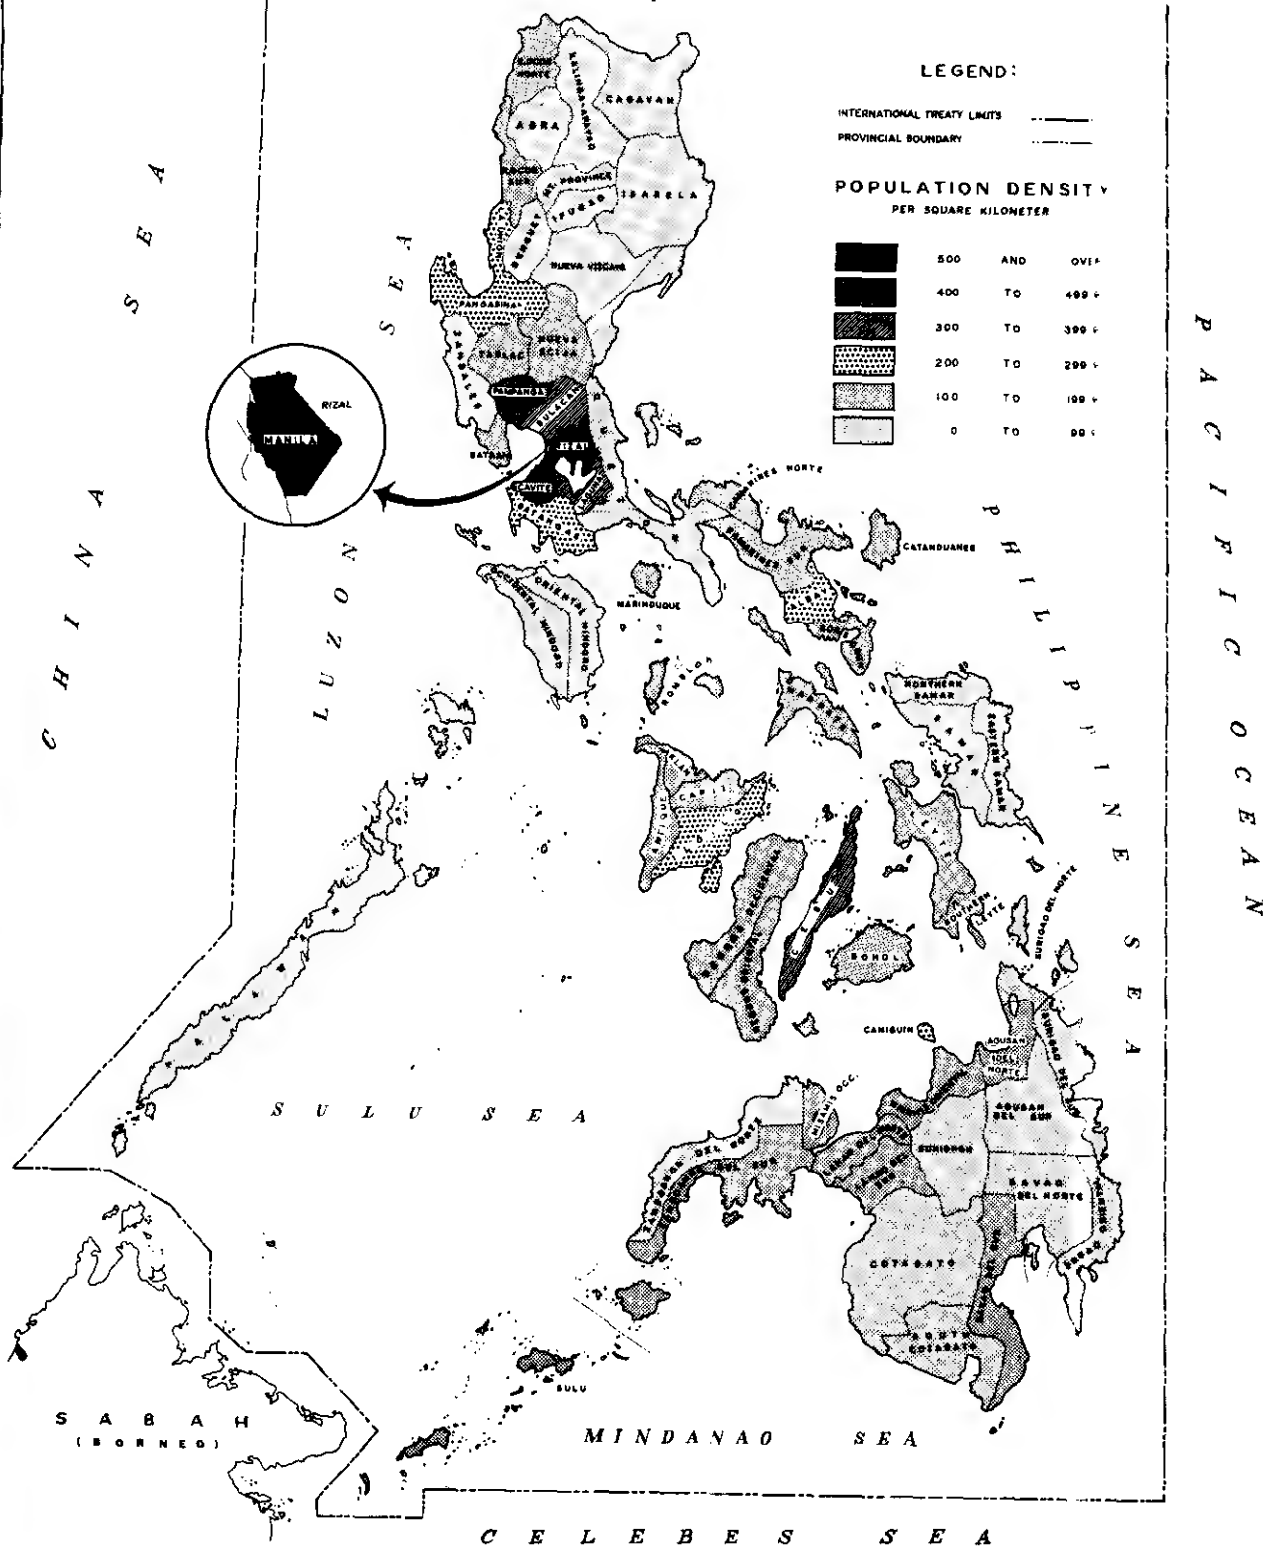

The different types of toilet facilities commonly used in buildings and houses throughout the country are the following:

1. Flush system/water-sealed—Water-sealed toilet is a type where after water is flushed or poured into the bowl a small amount is left in the bowl which seals its bottom from the pipe leading to the depository. In effect, flush toilet is one type of water-sealed toilet.

Another type of water-sealed toilet is the cement bowl with structure quite similar to an enamel bowl. It is connected to septic tank or concrete depository or sometimes drum or closed pit.

2. Antipolo system or closed pit—is a type of toilet where water is not used. It is a closed pit or a drum with a small opening on floor level or with a box-like structure which is elevated from the floor.
3. Open pit system—is a pit which is entirely open or partially covered.
4. Public toilet—is any type of toilet for communal use.

POPULATION DENSITY MAP OF THE PHILIPPINES BY PROVINCE: 1970

PHILIPPINES

INTRODUCTION

The Philippines consists of 7,100 islands located north of the equator, its boundaries defined by the South China Sea on the west, the Pacific Ocean on the east, and the Celebes Sea and the coastal waters of Borneo on the south. Of these islands 2,773 have been named while 4,327 are still unnamed. Stretching 1,841 kilometers from north to south and 1,062 kilometers from east to west it lies about 966 kilometers off the southern coast of Asia. The Batanes islands form the northernmost portion of the archipelago and the Tawi-Tawi group, the southernmost. The former is only about 128 kilometers from the southernmost tip of Taiwan and the latter 65 kilometers from British North Borneo.

While the topography of the country is generally mountainous in the interior, its coastal plains are narrow but fertile. Its mountain peaks, the highest of which are Mt. Apo in Mindanao (9,690 ft.) and Mt. Pulog in Luzon (8,841 ft.), are mostly of volcanic origin.

As of the 1970 census, 67 provinces, 1,439 municipalities, 59 cities, 21 municipal districts and 32,063 barrios comprise the Philippines. Quezon City, the official capital of the country, is located in Rizal, the most industrially advanced of the provinces.

LAND AREA AND POPULATION

The Philippines has a total population of 36,684,486 unevenly distributed over a total land area of 300,000.0 square kilometers, or an average density of 122.3 persons per square kilometer. Almost all of the inhabitants are native born (99.5%) with the foreign born comprising less than one percent (Table 1-9). Of the 7,100 islands, eleven (11) constitute 92.3 percent of the total land area. Luzon, the largest, has an area of 104,687.8 square kilometers, followed by Mindanao with 94,630.1; Samar, 13,080.0; Negros, 12,705.1; Palawan, 11,785.1; Panay, 11,515.1; Mindoro, 9,734.6; Leyte, 7,214.4; Cebu, 4,422.0; Bohol, 3,684.8; and Masbate, 3,269.0 square kilometers.

The sex structure of the population is slightly dominated by the females. For every 100 females in the country there are 99 males. Percentage-wise 50.3 percent of the populace are females and 49.7 percent are males (Table 1-7). From 1960 to 1970 the Philippine population increased by 9,596,801, or 35.4 percent. During the period in review, the country grew annually at the rate of 3.01 percent.

In point of population size, Rizal, with 2,844,689 inhabitants, ranks first among the provinces, Cebu, with 1,634,182 ranks second, followed closely by Negros Occidental with 1,503,782 while Pangasinan with 1,386,143 and Manila, 1,330,788, are fourth and fifth, respectively. Provinces ranking 6th, 7th, 8th and 9th have a population of more than 1 million each. Iloilo has 1,167,973; Cotabato, 1,136,007; Leyte, 1,110,626; and Zamboanga del Sur 1,034,018. Quezon, ranking 10th, has less than a million, or 983,324 inhabitants. In sharp contrast, the least populous, have a population of less than 100 thousand. Mountain Province is sparsely populated with only 93,112; Ifugao, 92,487; Camiguin, 53,913; and Batanes, merely 11,388. All the rest have population counts ranging from 136,249 to 948,436.

The population of Rizal represents 7.75 percent of the total Philippine population while that of Cebu and Negros Occidental put together make up 8.55 percent. On the other hand, the Batanes population constitute a mere 0.03 percent; Camiguin, 0.15 percent; Ifugao and Mountain Province, 0.25 percent each; and Kalunga-Apayao, 0.37 percent.

In the 1960 census, Rizal, Cebu, and Negros Occidental likewise occupied 1st, 2nd, and 3rd positions. Leyte, which ranked 4th, dropped to 8th place in 1970 due to the creation of its southern portion as a separate province (Southern Leyte) in July 1, 1960. Meanwhile, Pangasinan, then number 6, moved up to 4th. Manila and Cotabato, however, maintained their positions (5th and 7th) while Iloilo, then 8th, jumped to 6th. Although Zamboanga del Sur and Quezon previously ranked 12th and 14th, both experienced an unprecedented upsurge in population during the intercensal period consequently displacing Davao and Samar from 9th and 10th, respectively. Like Leyte, the two provinces also suffered loss of territory when each was split into three provinces.

According to density, however, Manila populated by 34,746 persons per square kilometer, ranks foremost. Rizal, with 1,529.7 a far second while Pampanga and Cavite are third and fourth, respectively, with 416.0 and 404.0. In 1960 Manila and Rizal held the same ranks, with 29,728.7 and 783.2, respectively. The third and fourth positions, however, were then occupied by Cavite with 293.7 and Laguna with 268.3. Pampanga, then number 6 with a density of 283.1, experienced a rapid increase in population during the intercensal years, that by 1970, the province had outranked both Cavite and Laguna.

While the aforementioned provinces have very dense populations, Palawan, Kalunga-Apayao, Agusan del Sur, and Occidental Mindoro present a sharp contrast. Extremely low densities are recorded for each of these provinces: 15.9 for Palawan; 19.3 for Kalunga-Apayao; 19.5 for Agusan del Sur; and 24.5 for Occidental Mindoro.

HOUSEHOLDS AND CONJUGAL FAMILY NUCLEI

An aggregate of 8,163,128 households and 6,435,676 conjugal family nuclei are reported for the whole country. On the average each household is composed of 5.9 persons and each conjugal family nucleus, of 5.7 persons (Table 1-6).

URBAN-RURAL RESIDENCE

The country is still predominantly rural. More than two-thirds or 68.2 percent of the populace reside in rural areas and less than one-third, or 31.8 percent, in urban areas. While the females slightly outnumber the males in the urban areas, the reverse is true in rural areas. Of the urban residents 51.4 percent are females and 48.6 percent, males as compared to 49.7 percent and 50.3 percent, respectively, of the rural residents (Table 1-7).

AGE COMPOSITION

Although more than half (51.4%)¹ of the Philippine population belong to the productive or working ages (15 to 64 years), the country has a considerably high proportion of the youth population. Over two-fifths, or 45.7 percent are 0 to 14 years of age. Only 2.9 percent, 65 years old and over. Put together, the young and older age groups make up 48.6 percent, accounting for the dependency ratio in the country. For every 100 persons in the productive or working ages, 94 are considered "dependents". The median age of the population is 15.8 years,¹ that is, half are under age and the other half, over it.

Comparatively, the urban areas have a much older population than the rural areas. In the former 42.1 percent are the young age group, 55.1 percent, in the productive ages; and 2.8 percent, in the older age group.

¹ Figures used in the Final Provincial Reports were based on the Ad Report of the National Summary.

PHILIPPINES

the older age group, while in the latter the respective figures are 7.4 percent, 49.7 percent, and 2.9 percent. Thus, while the dependency ratio in the urban areas is 81, that in the rural areas is 101 (Table I-7).

ECONOMICALLY ACTIVE POPULATION

Out of 25,122,640 persons aged 10 and over 49.0 percent are economically active while 50.8 percent are considered not economically active. A great majority (92.3%) of those in the economically active category are employed, with the unemployed comprising less than percent (7.7%). Among the unemployed 55.7 percent are seeking work for the first time. Of those not economically active, housekeepers make up 51.5 percent; students, 11.6 percent; and "others", 36.9 percent (Table II-1).

CLASS OF WORKER

Over two-fifths, or 41.7 percent of the 11,775,286 experienced workers in the country are working for wages and salaries. About 8.1 percent are in their own business and 19.8 percent are unpaid family workers (Table II-3).

The private sector employs a large proportion (82.7%) of the wage and salary workers while the government absorbs the remaining 17.3 percent. On the other hand, almost all of those working in their own business are self-employed (96.5%).

INDUSTRY

The Philippines is basically an agricultural country, despite great strides in industrialization. More than half, or 53.8 percent of the experienced workers are engaged in agriculture, hunting, forestry and fishing, with only 16.4 percent in services and 11.9 percent in manufacturing. Less than one-tenth (7.3%) are engaged in commerce, while merely 4.4 percent are in transport, communication and storage and 3.9 percent, in construction (Table II-6).

Four-fifths (80.5%) of the agricultural workers are males and only one-fifth (19.5%) are females (Table II-1).

OCCUPATION

Out of 11.7 million experienced workers in the country, 53.1 percent are farmers, fishermen, hunters, loggers and related workers by occupation. Craftsmen, production process workers and laborers comprise 14.4 percent; service, sports and related workers, 7.6 percent; sales workers, 6.8 percent; and professional, technical and related workers, 5.7 percent. A few are workers in transport and communication (4.3%), clerical workers (3.2%), and stevedores and related freight handlers (2.2%), while the rest are distributed over the other minor occupations (Table II-7).

NUMBER OF HOURS WORKED

Of the total employed workers, 48.6 percent worked for 45 hours and over during the reference week. While 30.5 percent rendered 35-44 hours work, nearly the same proportion worked for 15-34 hours (9.2%) as those who reported having worked 15-24 hours (8.9%). The smallest percentage (2.4%), however, represented those with less than 15 hours (Table II-13).

USUAL OCCUPATION

By usual occupation or activity during the last twelve months preceding May 6, 1970, farmers, hunters and loggers constitute more than 6.5 million, or 52.9 percent of the total economically active populace. Craftsmen, production process workers and laborers rank a poor second, with only 13.9 percent, followed by service, sports and related workers with 7.7 percent; professional, technical and related workers, 6.4 percent; and sales workers, 6.2 percent. A number are in transport and communication (4.4%) and in the clerical service (3.1%), while a few are stevedores, freight handlers and related workers (2.4%). The rest are administrative, executive and managerial workers (1.1%), members of the Armed Forces (0.5%), miners and quarrymen (0.3%), and workers whose usual occupation are unspecified (1.1%) (Table II-16).

MARITAL STATUS

Nearly 25 million (24,953,049) of the total population are 10 years old and over, of which the never married constitute 48.3 percent and the married, 47.0 percent. Only 4.0 percent are widowed and less than one percent (0.5%) divorced or separated.

Half of the males (50.4%) have never married as compared to 46.3 percent of the females. About the same proportion of either sex however, are married with 47.0 percent for the males and 47.2 percent for the females. However, more females (5.8%) than males (2.1%) are found in the widowed category (Table III-1).

LITERACY AND EDUCATION

Among the population aged 6 and over, 76.4 percent are literate or "able to read and write" a simple message. The level of literacy is very much higher in the urban areas where 86.6 percent of the population in the same age group are literate, compared to 71.5 percent in the rural areas (Table III-4).

Comprising the population 25 years old and over are 12,696,808 persons more than half (56.1%) of whom have completed at least a year of elementary education. However, only 14.1 percent have gone through high school and 9.5 percent, college, while 19.7 percent have not finished any grade at all (Table III-6).

Comparatively, the urban populace belonging to this age bracket are better educated than their rural counterparts. In the urban areas 45.5 percent have had an elementary education; 24.1 percent, high school; and 20.9 percent, college. Most of those in the rural areas have completed an elementary education (61.3%), with only 9.3 percent having finished a year or more in high school and 4.0 percent, college. One-fourth (24.9%) out of 8,553,600 persons in the rural areas have not had any formal schooling, compared to 9.0 percent in the urban areas.

A smaller proportion of the population 6 years old and over are attending than not attending school. Out of 29.6 million persons falling under this age bracket, only 28.1 percent are in school while 71.9 percent are out of school (Table III-9). Of those attending school 8,168,759 are between the ages of 6 to 24, representing 48.3 percent of the total population in this age group. Half of those attending school in the 6-24 year age bracket are males (49.9%) and the other half are females (50.1%).

PHILIPPINES

HOLDERS OF COLLEGE DEGREE

A dearth may be observed in the number of professionals in the country. Of the total population, a mere 3.0 percent are college graduates, most of whom have specialized in the field of education. Holders of a degree in Education and Elementary Education, including those with an Elementary Teacher's Certificate, comprise more than two-fifths (44.1%) of the 1,183,760 professionals in the country. Nearly 261 thousand, or 24.1 percent are in the Social Sciences, particularly commerce, while a few are in the Medical Sciences (8.2%) and in Engineering (8.0%). Among the less saturated fields of study are Law with 4.0 percent and the Humanities with 3.7 percent. Surprisingly, despite the Philippines being a highly agricultural country, merely 1.6 percent hold a degree in Agriculture, which is only slightly higher than those with a Fine Arts degree (1.1%). The Natural Sciences, with barely one percent (0.6%), attract the least number of college students (Table III-10).

Comparatively, the females dominate the field of Education with 60.5 percent out of 603,145 female professionals as compared to 23.6 percent of the 480,615 males. On the other hand, more males than females are in the Social Sciences and Engineering, with 30.1 percent and 16.1 percent, respectively. In sharp contrast the corresponding figures for the females are 19.2 percent and 0.8 percent, showing that the field of Engineering is still a male domain. While there is likewise a predominance of females in the Medical Sciences (10.5%) especially in Nursing, the reverse is true in the field of Law, where they constitute merely 0.7 percent. Among the males 5.2 percent are in the Medical Sciences and 8.2 percent in Law.

MOTHER TONGUE

Tagalog, spoken by almost one-fourth (24.5%) of the population and Cebuano, by about the same number (24.2%), are the two principal dialects in the country. Iloco is being spoken by 11.3 percent; Hiligaynon, 10.2 percent; Bicol, 6.8 percent; Samar-Leyte (Waray-Waray), 4.8 percent; Pampango, 3.3 percent; and Pangasinan, 2.3 percent. The remaining 12.6 percent speak one of several other dialects in the Philippines (Table III-15).

Tagalog is primarily the major mother tongue in the urban areas where 43.3 percent speak the dialect as compared to only 15.6 percent in the rural areas. Cebuano, which ranks first (27.0%) among the dialects in the rural areas is being spoken by 17.9 percent in the urban areas. While more people likewise speak Hiligaynon (9.4%) than Iloco (7.7%) in the urban areas, the reverse is true in the rural areas where 13.0 percent speak Iloco and 10.6 percent, Hiligaynon.

More than half (55.2%) of the Philippine populace are able to speak Pilipino, the national language of the country. While over two-fifths, or 44.7 percent, are able to speak English, only 3.6 percent are able to speak Spanish (Table III-18).

RELIGION

The Philippines is predominantly a Roman Catholic country. Roman Catholicism, with a following of 31,169,488, or 84 percent of the total population, leads all other religions. Islam, which has over 1.5 million followers, constitute only 4.3 percent; Aglipayan, 1.4 million; or 3.9 percent; Protestantism, 1 million, or 3.1 percent; "others", 1.7 percent; and Iglesia ni Cristo, 1.3 percent. Barely one percent (0.7%) are without any religious affiliation while an insignificant 0.1 percent are adherents of Buddhism (Table III-20).

FERTILITY

An average of 5.4 children are born alive to ever-married women in the country who have reached the end of their childbearing period (50 years and over). Ever-married women in the urban areas, however, appear to be less fertile than their rural counterparts, with an average of 5.1 children as compared to 5.7 for the latter (Table IV-1). In the same age group, 7.5 percent of 1,917,785 ever-married women have had no children by the end of their reproductive period. The proportion of ever-married women falling under this category is slightly higher in the urban (7.9%) than in the rural areas (7.3%). On the other hand, the average number of children born to ever-married women who have already borne at least one child is 4.5, although slight variations may be noted between those in the urban (4.2%) and in the rural areas (4.6%).

Filipino women tend to marry early. Nearly three-fifths (59.3 percent) of the 7,551,740 ever-married women were married by the age of 20 and 87.9 percent, by the age of 25 (Table IV-2). It is interesting to note that over one-third (34.7%) of the total ever-married women were married between the ages of 18 to 20.

MIGRATION

Three-fourths (75.2%) of the total population live in the same municipality where they were born. A few (7.1%) reside in a municipality other than the municipality of birth, but in the same province, while 17.2 percent live in a province other than the province of birth. The foreign-born population constitute a negligible percentage (0.2%), smaller than those whose place of birth is unspecified (0.3%) (Table IV-9).

Among the 10-year-old and over population 83.5 percent reside in the same municipality where they were residing in 1960. Only 5.2 percent live in a municipality other than the municipality where they resided during the last decade, though within the same province. However, 10.6 percent were residents of a province other than the present province of residence (Table IV-10).

PHILIPPINES

Between the urban and the rural areas, however, there is more mobility among the inhabitants in the former than in the latter areas. Among the urban residents aged 10 and over, 76.4 percent live in the same municipality as the municipality of residence in 1960, while 17.2 percent reside in a province different from the province of residence in 1960. On the other hand, the corresponding figures for their rural counterparts are 87.2 percent and 7.3 percent, respectively. No marked difference, however, may be noted for residents of municipalities other than those in 1960, but within the same province, with 5.1 percent for the urban and 5.2 percent for the rural areas (Table IV-11).

NUMBER OF DWELLING UNITS

The May 1970 Census reports a total of 6,099,844 dwelling units in the Philippines. Of this figure 98.5 percent are occupied and 1.5 percent are unoccupied (Table I). The rural areas claim 69.8 percent of the dwelling units; the urban areas, 30.2 percent.

Majority (88.5%) of the dwelling units are found in the single house type of structure. Apartment or accessorias house 3.8 percent of the dwelling units; duplex houses, 3.2 percent; barong-barong or makeshift shelters, 3.6 percent; commercial, agricultural, industrial and institutional buildings, 0.9 percent.

In both urban and rural areas the single house type of building prevails, housing 77.9 percent and 93.1 percent of the dwelling units, respectively. The only marked difference is in the proportion of dwelling units found in apartments or accessorias which house 11.2 percent of the urban dwelling units compared to only 0.6 percent of the rural dwelling units.

TYPE OF CONSTRUCTION MATERIAL OF ROOF AND WALL

The use of any particular construction material either for walls or roof is primarily affected by its supply and acquisition costs. In this connection, wood, with its relatively adequate supply and lower cost, is the most widely used walling material. Of the total number of dwelling units, 46.3 percent utilize this material (Table 2). Next in preference is bamboo, used in 25.3 percent. The other walling materials used are: concrete, in 8.6 percent of the dwelling units; galvanized iron, in 1.1 percent; and nipa, in 16.3 percent.

In the urban areas preferences are for wood (used in 61.0% of the dwelling units) and concrete (in 20.2%). In the rural areas with its bountiful forestry products, the widely used are wood (in 40.0%), bamboo (in 32.3%) and nipa (20.1%).

For roofing materials, 42.4 percent (of dwelling units) utilize aluminum or galvanized iron. More than a third (36.5%) use nipa; 18.5 percent, cogon; 0.7 percent, tile or concrete and 0.3 percent, asbestos. The two most common roofing materials in the urban areas are aluminum/galvanized iron and nipa with 68.6 percent of the dwelling units using the former and 25.3 percent, the latter. In the rural areas the more widely utilized are nipa (in 41.4%) aluminum/galvanized iron (in 31.1%) and cogon (in 25.1%).

TYPE OF TENURE

Owner-occupied dwelling units (including owned and a part rented out and owned and a part occupied free by others) constitute 87.7 percent of the total number of occupied dwelling units (Table 3). Those falling under the categories rented only, rented and a part occupied free by others, and rented and a part rented out account for 8.6 percent; while the occupied rent-free and occupied rent-free with a part rented out make up 3.7 percent.

The owner-occupied dwelling units prevail in both urban and rural areas, making up 69.8 percent of the total number in the former and 95.4 percent in the latter. The only marked difference is in the rented dwelling categories which account for 25.5 percent of urban dwelling units as against only 1.2 percent of the rural.

YEAR OF CONSTRUCTION

It will be noted that most of the 6 million dwelling units are of a relatively recent vintage, with almost half or 49.2 percent having been constructed during the period 1965-1970 (Table 4). During 1955-1964, 33.7 percent were built, during 1945-1954, 12.7 percent and during the War (1942-1944), 1.1 percent. Dwelling units of prewar vintage account for 3.3 percent of the present number.

More than 70 percent of dwelling units for all types of building were constructed during the periods 1965-1970 and 1955-1964. In the barong-barong category, particularly, 72.8 percent were constructed between 1965-1970 alone. Furthermore, it is only for institutional buildings that the proportion of pre-war dwelling units exceed one-tenth (14.0%).

NUMBER OF HOUSEHOLDS IN EACH DWELLING UNIT

Households occupying one dwelling unit each total 5,882,498 or 95.4 percent of the total number which is 6,163,128 (Table 5). Households sharing a dwelling unit with another household account for 3.6 percent. Those on a three household to one dwelling unit basis make up 0.7 percent; the four household per dwelling unit, 0.1 percent. The six or more households per dwelling unit group is less than .05 percent.

Most of the households in both urban and rural areas are on a one household per dwelling unit basis, (92.2 percent for the former and 96.9 percent for the latter). The multiple household type (i.e., two or more households per dwelling unit) is more prevalent in the urban areas, being more densely populated. Urban households falling under this category account for 7.8 percent of the total number against only 3.1 percent in the rural areas.

NUMBER OF ROOMS BY NUMBER OF OCCUPANTS

As shown in Table 7, most of the occupied dwelling units have either one, two or three rooms, with more than four-fifths or 81.5 percent of the total number falling into this category. Those having four rooms account for 10.6 percent of the total occupied dwelling units; five rooms, 4.3 percent; six rooms, 1.9 percent and seven or more rooms, 1.6 percent.

PHILIPPINES

The majority of occupied dwelling units in both urban and rural areas have one to three rooms, (72.8% in the former and 85.2% in the latter). It may be noted that the proportion of dwelling units having seven or more rooms in the urban areas is four times that in the rural areas (3.6% as compared with 0.9%). This may be due perhaps to the concentration of hotels, apartments, commercial and institutional buildings in the former area.

The median number of occupants per dwelling unit in the Philippines is six. For the one and two-room dwelling units, the median number of occupants is five, for the three and four room units, six occupants; the five, six and seven room units, seven occupants and those with eight and more rooms, eight occupants.

OWNERSHIP OF RADIO, TELEVISION SET AND REFRIGERATOR

Low acquisition costs make the radio the most widely owned of the three appliances studied. Almost half (48.7%) of the 6.163 million households have radios as compared to only 5.5 percent having television sets and 5.5 percent having refrigerators (Table 9).

More households in the urban than the rural areas are equipped with these conveniences. In the former 63.8 percent are with radios, 16.3 percent with television sets and 15.7 percent with refrigerators. Among rural households, 42.0 percent own radios, 0.8 percent own television sets and 1.0 percent own refrigerators.

LIGHTING FACILITIES

Kerosene is used for lighting by 4,656,640 households or 75.5 percent of the total number (Table 11). Electricity is used by 23.2 percent while oil and other fuels by 1.3 percent.

Electricity is used by 60.3 percent of urban households, compared to only 6.8 percent of their rural counterparts. On the other hand, kerosene is used by 91.7 percent of households in the latter area compared to only 39.0 percent in the former.

WATER SUPPLY

The major sources of water are the pump, used by 28.8 percent of the total households; piped water, by 24.0 percent and the open well, by 22.4 percent (Table 13). Households availing of the spring account for 11.5 percent; the artesian well, 8.5 percent; rain water, 2.6 percent and lake, river, stream, etc., 2.2 percent.

More than half or 54.3 percent of urban households use piped water and 25.3 percent use the pump. In comparison, the pump and the open well are the major sources of water, servicing 30.3 percent and 29.7 percent of the rural households, respectively.

COOKING FUEL

Wood is used by 79.3 percent of the total number of households; kerosene by 10.9 percent; gas (liquefied petroleum), by 5 percent; electricity by 2.7 percent; charcoal and other fuels by 1.4 percent (Table 14).

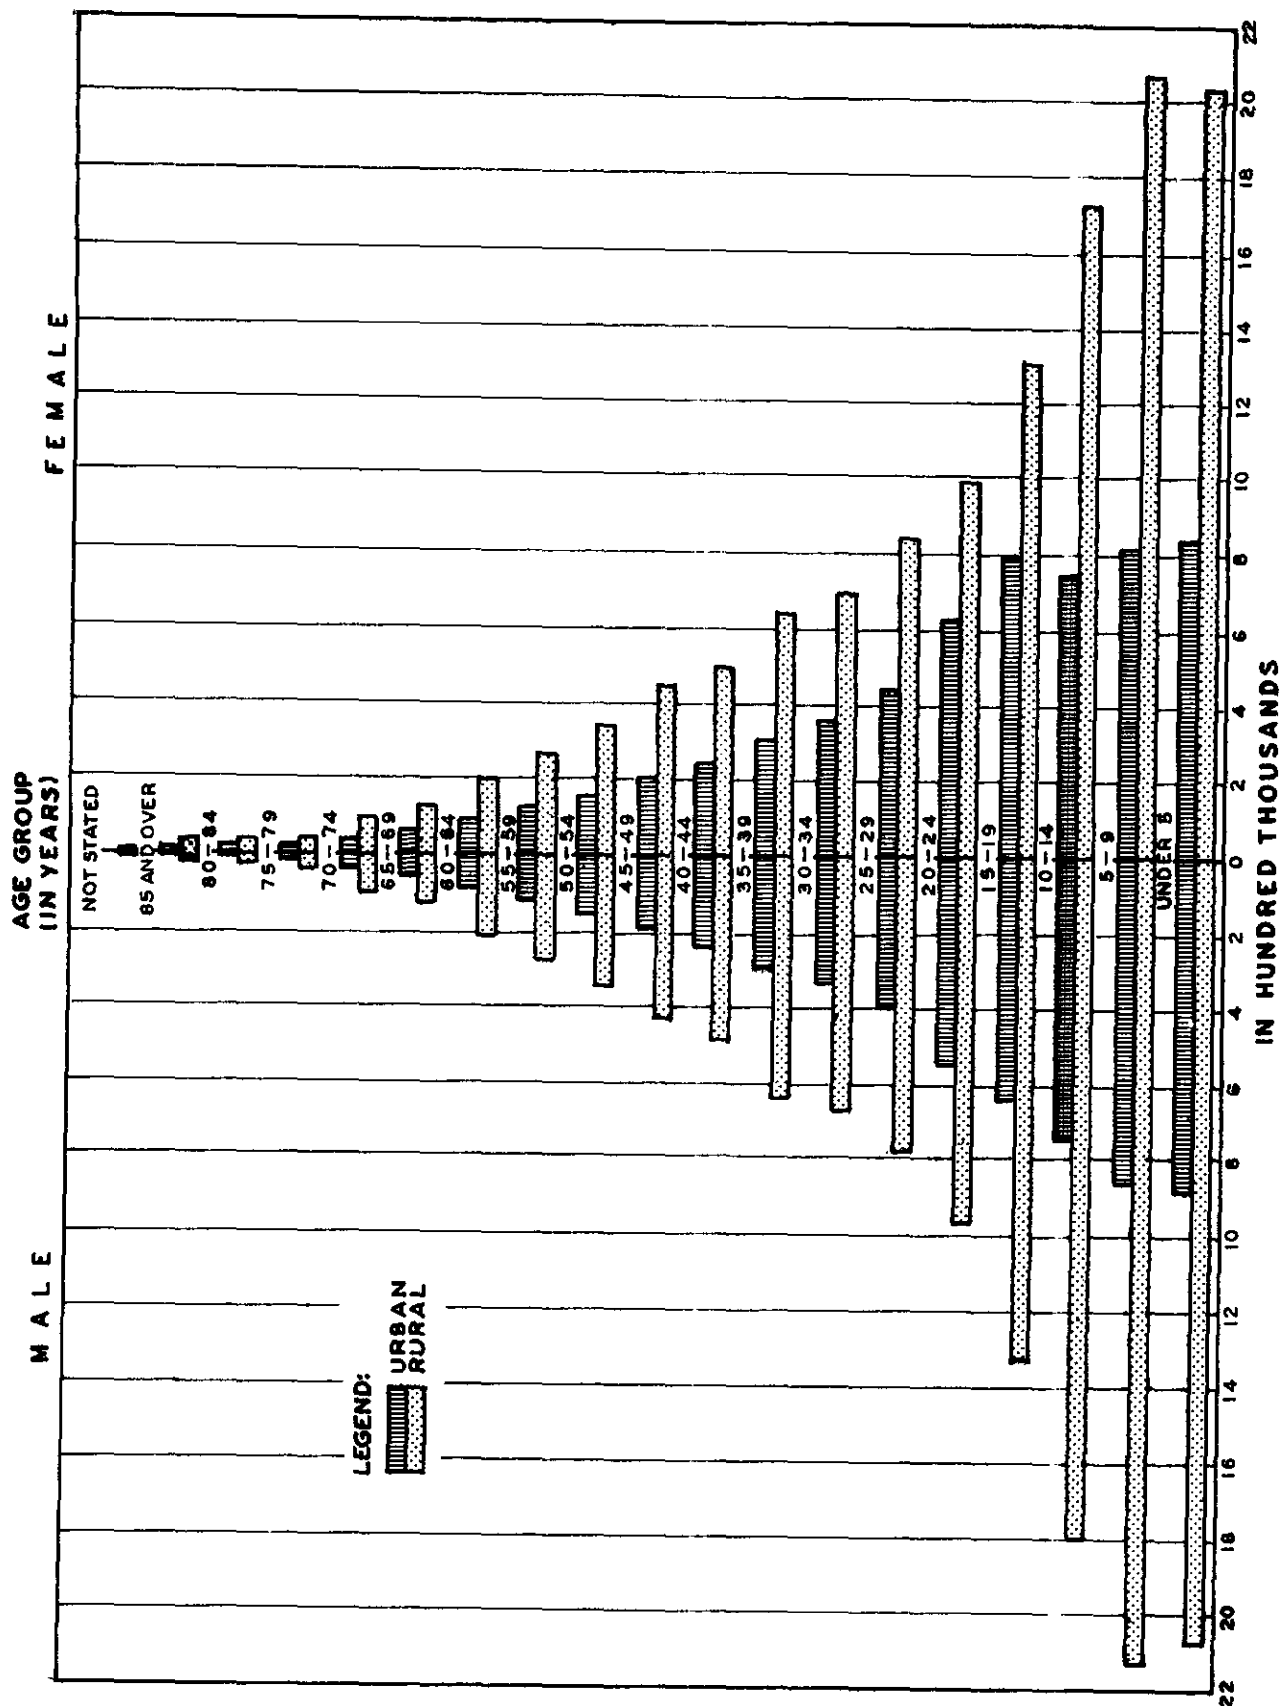

In the urban areas, 49.3 percent use wood as compared to 92.4 percent in the rural areas. The other cooking fuels of urban dwellers are kerosene, used by 26.0 percent; gas (liquefied petroleum), by 15.1 percent; electricity, by 8.2 percent; charcoal and other fuels by 1.4 percent. Among the rural households, only 0.1 percent use electricity, 4.3 percent, kerosene, 1.6 percent, gas, 1.4 percent, charcoal and other fuels.

TOILET FACILITIES

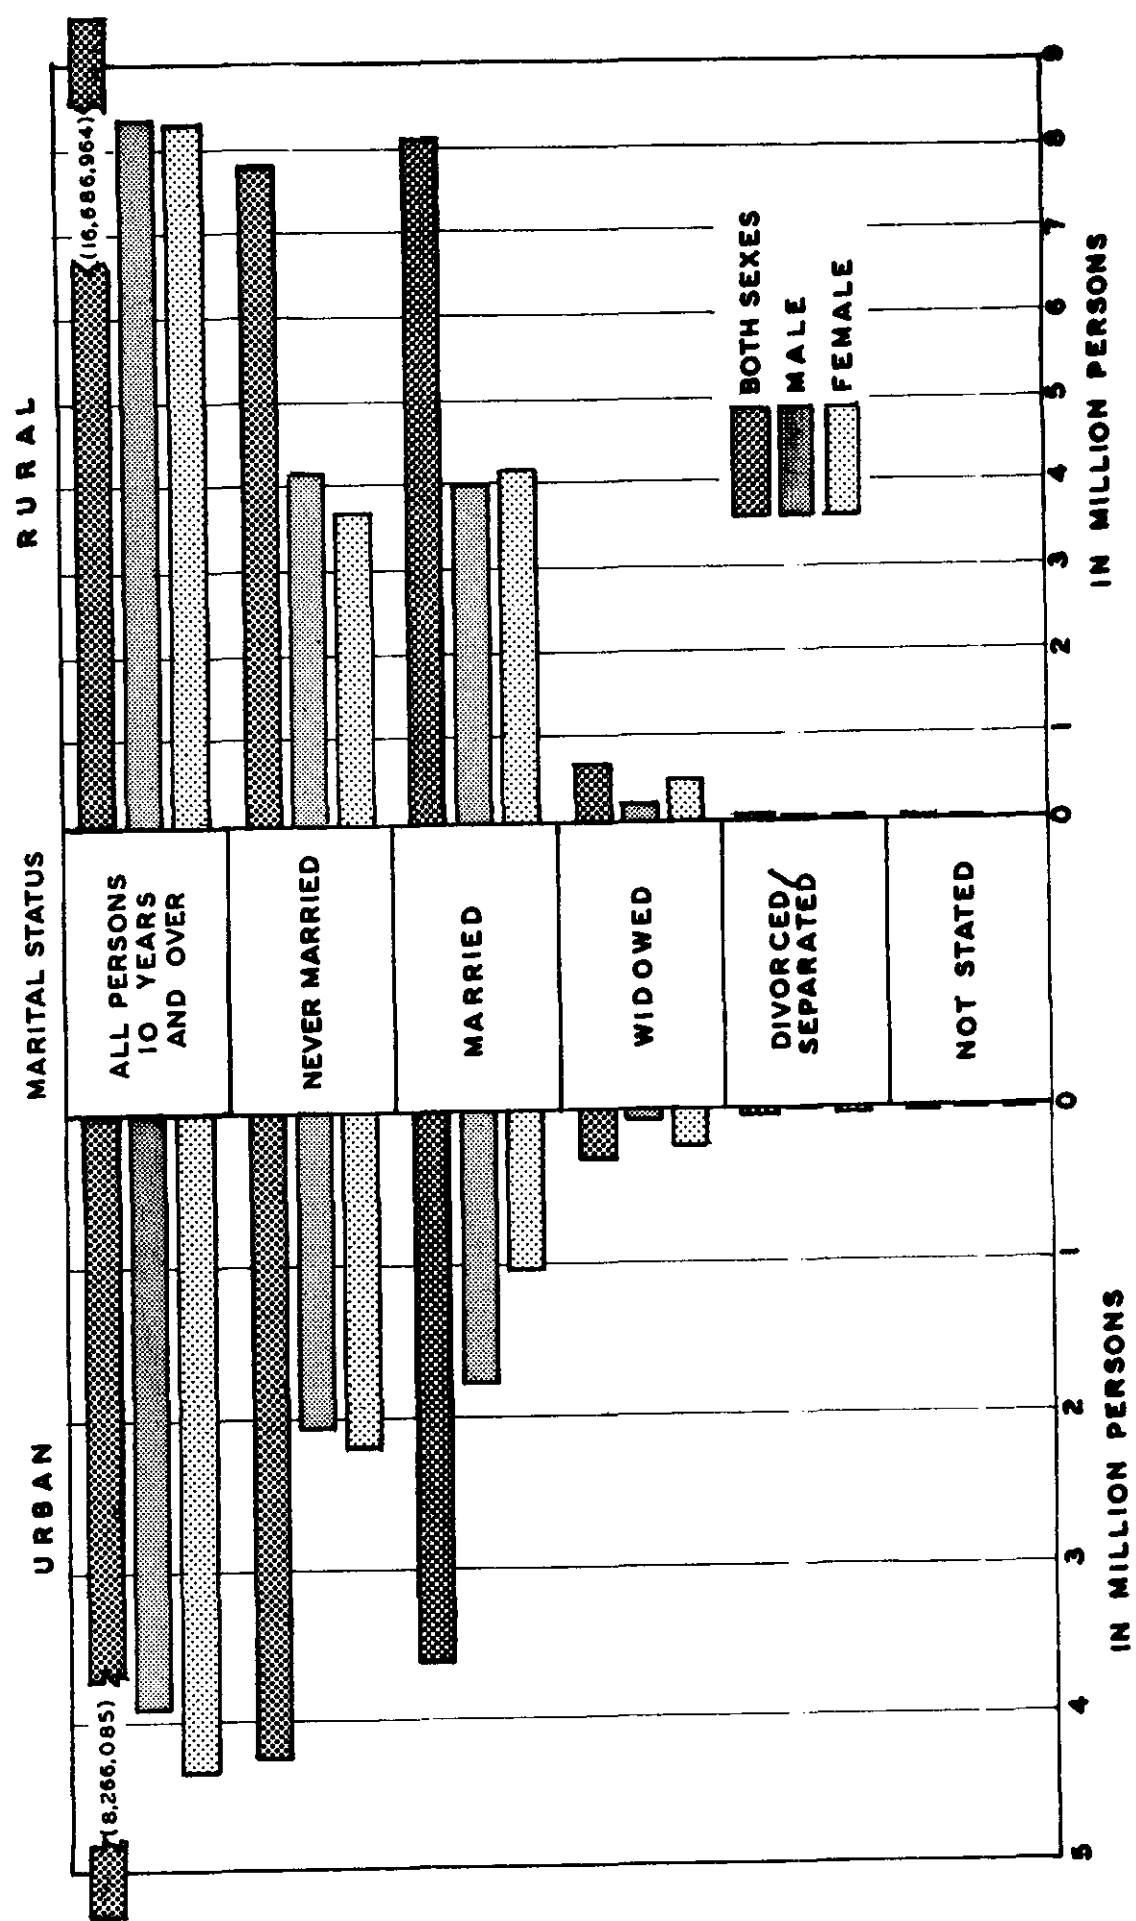

Toilet facilities seem to be a most neglected phase of Philippine housing. On the national level 36.7 percent are without toilet facilities (Table 15). More than 1/5 (22.6%) make use of the flush or water-sealed type; 22.9 percent, the open pit; 15.9 percent, the antipolo or closed pit and 1.9 percent, the public toilet.

This lack is more felt in the rural areas where 45.3 percent have no toilet facility than in the urban areas where the corresponding figure is 17.2 percent. Of the total urban households, 48.1 percent use the flush or water-sealed toilet; 19.1 percent, the antipolo or closed pit; 11.9 percent, the open pit; and 3.4 percent, the public toilet. In comparison the flush or water-sealed type is used by 11.2 percent of the rural households; the antipolo or closed pit by 14.5 percent; the open pit by 27.8 percent and the public toilet by 1.2 percent.

1970 PH Census Form No. 2
(Ordinary Household)

Household Serial No. _____
Census Building No. _____
Address: _____
(Number and street)

E.D. No. _____ Urban/Rural _____
City Dist./Poblacion/Barrio _____
City/Municipality/Municipal Dist. _____
Province _____
Island _____

Republic of the Philippines
Department of Commerce and Industry
BUREAU OF THE CENSUS AND STATISTICS
Manila

1970 CENSUS OF POPULATION AND HOUSING

THIS FORM IS FOR YOUR HOUSEHOLD

This census is authorized by Commonwealth Act No. 591, which empowers the Bureau of the Census and Statistics to collect data on population and all phases of the Philippine socio-economic life. The last census was in 1960.

The 1970 Census of Population and Housing will not only take a count of the number of inhabitants in the country but will also determine their various characteristics, such as geographic distribution, age, sex, marital status, education, housing conditions and facilities.

An analysis of these information will provide facts regarding the growth, distribution and composition of the population and their habitation. These facts will be used in the assessment of current and future population and housing growth as basis for policy and action.

The law requires that the census questions be answered. Estimates may be made where exact answers are not known. The law guarantees that the information you furnish will be accorded CONFIDENTIAL treatment. Your census report cannot be used for purposes of taxation, investigation, or law-enforcement procedures.

Your whole-hearted cooperation is hereby requested to ensure the success of this undertaking.

Thank you.

Tito A. Mijares

QUESTIONNAIRE

Questions H9 to H15 pertain to the conveniences of each household and should be answered by all households			
<p>How is this dwelling unit occupied?</p> <p>Owned and occupied by your household only.</p> <p>Owned and a part rented out.</p> <p>Owned and a part occupied free by others.</p> <p>Rented only.</p> <p>Rented and a part occupied free of others.</p> <p>Rented and a part rented out.</p> <p>Occupied rent-free.</p> <p>Occupied rent-free and a part rented out.</p>	<p>H9 Do you have a radio/transistor in working condition?</p> <p>1 Yes 2 No</p> <p>H10 Do you have a television set in working condition?</p> <p>1 Yes 2 No</p> <p>H11 Do you have a refrigerator in working condition?</p> <p>1 Yes 2 No</p>	<p>H12 What fuel do you use most of the time for cooking?</p> <p>1 Electricity 4 Wood 2 Kerosene 5 Charcoal 3 Gas (air) 6 Others</p> <p>H13 What do you use for lighting?</p> <p>1 Electricity 3 Oil 2 Kerosene 4 Others (gas)</p>	<p>H14 What is the source of your drinking water?</p> <p>1 Piped water 5 Spring 2 Artesian well 6 Rain water 3 Pump 7 Lake, river, streams, etc. 4 Open well</p> <p>H15 What kind of toilet facilities do you have?</p> <p>1 Flush/water sealed 2 Antipolo/closed pit 3 Open pit 4 Public toilet 5 None</p>

Include:

- All family members and other relatives living here, including those who died and excluding those babies born after the census date, 12:01 A.M., March 1, 1970;
- All persons who usually live here but are temporarily away;
- All lodgers, boarders, servants and other non-relatives who live or at least sleep here; and,
- All persons who are temporary residents with no usual place of residence or who are not certain they will be enumerated at their usual place of residence.

Do not include:

- College students away at school or here only on vacation;
- Persons with usual place of residence elsewhere who are visiting here;
- Persons who take meals with the household but sleep elsewhere;
- Persons away in the Armed Forces; and,
- Persons away in an institution such as mental hospital, sanatorium, jail, etc..

For determining the number of family nuclei, please consult your Enumerator's Manual.

Please read the following specific instructions carefully.

➡ Encircle the corresponding number of the answer to the questions.

Example: In P2 - "What is his relationship to the head of the household?" If the answer is "Wife," encircle No. 2; if the answer is "Grandchild," encircle No. 5.

➡ In a case where the answer does not appear in the list, specify the answer and enter the proper code as found in the Appendix of the Enumerator's Manual.

Example: In P6 - "What country is he a citizen of?" If the answer is "Germany," write "Germany" on the blank space. Refer to the "List of Countries" in the Appendix of the Enumerator's Manual for the code of Germany, and enter the code in the box provided for it.

➡ Where the answer is a numerical entry, such as age (P4); and others, enter the number in the proper box.

➡ For questions which require a specific entry write the specific answer on the proper space and refer to the Appendix of the Enumerator's Manual for the proper code and enter said code in the box provided for it.

RE M I N D E R

After you have enumerated all the persons in the household as listed in the "Household Membership" block, please review your answers for accuracy and completeness:

1. Be sure you have answered the questions below "Household Membership."
2. Be sure you have not left a blank in questions P1 to P10 for each person as listed in the "Household Membership."
3. Be sure you have asked correctly H1 to H15 of the right person. Remember that questions H1 to H5 are to be asked only of the first household to be interviewed in the building; H6 to H8 are asked of any household in the dwelling unit; and H9 to H15 are to be asked of every household.

1970 CENSUS OF POPULATION AND HOUSING

THIS FORM IS FOR YOUR HOUSEHOLD

This census is authorized by Commonwealth Act No. 591, which empowers the Bureau of the Census and Statistics to collect data on population and all phases of the Philippine socio-economic life. The last census was in 1960.

The 1970 Census of Population and Housing will not only take a count of the number of inhabitants in the country but will also determine their various characteristics, such as geographic distribution, age, sex, marital status, education, housing conditions and facilities.

An analysis of these information will provide facts regarding the growth, distribution and composition of the population and their habitation. These facts will be used in the assessment of current and future population and housing growth as basis for policy and action.

The law requires that the census questions be answered. Estimates may be made where exact answers are not known. The law guarantees that the information you furnish will be accorded CONFIDENTIAL treatment. Your census report cannot be used for purposes of taxation, investigation, or law-enforcement procedures.

Your whole-hearted cooperation is hereby requested to ensure the success of this undertaking.

Thank you.

Number of families: _____	

Page 1 - Household Membership—List everyone who usually lives here.

Include:

- All family members and other relatives living here, including those who died and excluding those babies born after the census date, 12.01 A.M., March 1, 1970;
- All persons who usually live here but are temporarily away;
- All lodgers, boarders, servants and other non-relatives who live or at least sleep here, and,
- All persons who are temporary residents with no usual place of residence or who are not certain they will be enumerated at their usual place of residence.

Do not include:

- College students away at school or here only on vacation;
- Persons with usual place of residence elsewhere who are visiting here;
- Persons who take meals with the household but sleep elsewhere;
- Persons away in the Armed Forces; and,
- Persons away in an institution such as mental hospital, sanatorium, jail, etc..

For determining the number of family nuclei, please consult your Enumerator's Manual.

Please read the following specific instructions.

➡ Encircle the corresponding number of the answer to the questions.

Example: In P2 - "What is his relationship to the head of the household?" If the answer is "Wife," encircle No. 2; if the answer is "Grandchild," encircle No. 5.

➡ In a case where the answer does not appear in the list, specify the answer and enter the proper code as found in the Appendix of the Enumerator's Manual.

Example: In P6 - "What country is he a citizen of?" If the answer is "Germany," write "Germany" on the blank space. Refer to the "List of Countries" in the Appendix of the Enumerator's Manual for the code of Germany, and enter the code in the box provided for it.

➡ Where the answer is a numerical entry, such as age (P4); length of residence (P17); hours worked last week (P22); and others, enter the number in the proper box

➡ For questions which require a specific entry, write the specific answer on the proper space and refer to the Appendix of the Enumerator's Manual for the proper code and enter said code in the box provided for it. Follow specific instructions below:

- a. Place of birth (P16) or place of last previous residence (P18)—Write the name of the municipality only if it is in the same province of the present residence of this person; but if the place is outside of the province of present residence, enter the name of the province only; and,
- b. Vocational or technical skill (P19), occupation last week (P28), industry (P29) and usual occupation (P31)—Enter the specific skill, occupation, industry and usual occupation in their proper spaces.
